WILL CO-OPERATE WITH GOVERNMENT

The regular meeting of the town council on Monday night was attended by Mayor McLeod, Councillors J. Angus McDonald, Owen Morgan, William McVey, Alex. Morency, J. A. McDonald and E. Picariello, and Secretary Wright. The minutes of previous meeting were approved as read and the following were among the accounts passed for payment, subject to approval by committee: Sheet Metal Co. \$77.25, C. Fawer \$6.00, W. Foreman \$28.60, James Warner \$29.40, G. B. Cattole \$25.15, Scott's Grocery \$9.20, Northern Electric Co. \$15.11, J. H. Davis \$30.00, Canadian General Electric \$59.19, Alberta Government Telephones \$4.25, W. Sheppard \$20.40, Cosmopolitan Hotel (assessor's board) \$100.55, C. W. May, assessor, \$295.80; J. E. Gillis \$249.90; Account Fire at Pesthouse, eleven men, \$18.00; George Lang, \$20.55; J. Howe \$8.85; G. Maniquet \$6.45.

Moved by J. Angus McDonald and Owen Morgan that the town of Blairmore participate in the government's relief scheme, and that Mayor McLeod is hereby appointed relief officer under the said scheme. Carried.

Morgan—McDonald—That all dog licenses due shall be collected not later than April 15th. Owners not paid by that time to be summoned. Carried.

McVey—Morency—That tenders be called for the position of auditor for the Town of Blairmore for the year 1922. Carried.

Councillor McVey gave notice that at the next regular meeting of the Council he would introduce an amendment to Clause 5 of By-Law 15; also an amendment to By-Law No. 4, relating to soft drinks. The motion by Picariello—Morgan

JOE WAKALUK GETS TWO YEARS

The first session of the Blairmore criminal assizes was held here last Friday and Saturday, presided over by His Lordship Judge McDonald. But one case came up for trial, that of Joseph Wakaluk, of Hillcrest, charged with carnal knowledge of a girl of fourteen years.

Wakaluk elected to be tried by judge without a jury and pleaded "not guilty," through his solicitor, J. E. Gillis, of Blairmore. The case for the Crown was conducted by J. W. McDonald, K. C., of Macleod. A number of witnesses were heard for the prosecution, concluding which His Honor felt that defense would be unnecessary and he found Wakaluk guilty of a "brutal assault."

On giving sentence, His Honor felt that conditions of the native country of Wakaluk as compared with environment here should be considered and while the extreme penalty provided by the Statutes included the lash, he would sentence him to two years in Prince Albert penitentiary without the lash.

Wakaluk is a Russian and not a bad looking character. He is about twenty-two years of age.

The prisoner was taken to Lethbridge by Constable Moir on Sunday night. From Lethbridge he was accompanied to Prince Albert by an officer of the A.F.P., also in charge of another prisoner.

By that "Taxes on Lots 11-12-13-14 in Block 2, Plan 3319-1 be reduced to a price whereby they can be used at a profit to the Town, (not over \$100), was lost. The taxes involved in the above four lots, which are s'tuate in the park at the rear of the Alberta hotel amount to over four hundred dollars and is included in the last advertised tax recovery list. The school district is considerably interested in said tax arrears.

The application of Ritchie Paterson Co. for the appointment as auditors for the ensuing year was laid on the table until tenders are called for.

GOLF CLUB REORGANIZE

The annual meeting of the Blairmore Golf Club was held on Friday night last at the general office of the West Canadian Collieries and was largely attended.

A report from the secretary-treasurer showed the Club to be in a good position financially, having on hand from last season the sum of \$168.25. The election of officers resulted as follows:

Honorary President—Jules Charbonnier.

President—Roual Green.

Vice-President—J. H. Farmer.

Secretary—Assurer—Arthur Kelly.

Captain—J. B. Wilson.

Executive—Bird, A. R. Granger, L. P. Robert, R. G. Foot, D. M. J. Conway, H. M. Bennett, G. A. Passmore.

Ladies' Officers and Committees

Captain—Mrs. J. H. Farmer.

Secretary—Mrs. J. R. Smith.

Executive—Mrs. R. Green, chairman; Mrs. Pinkney, Mrs. Bird, Mrs. Morgan, Mrs. Passmore, Mrs. Robert.

A general discussion took place regarding the grounds and it was estimated that between two and three hundred dollars would have to be spent on the course in renovating tees, greens, etc.

The offers of Mr. Charbonnier to erect a club house near the course with kitchen equipment, etc., was accepted, it being understood that the Club would pay a small yearly rental fee for same.

A vote of thanks was accorded the West Canadian Collieries Co. for use of their office for this meeting, and to Mr. Charbonnier for his liberal offer of a clubhouse.

In Five Years

How much do you spend in a week on trifles you would never miss?—About three dollars? That amount, deposited every week for five years, would amount to \$841.02.

For a full trial, send for a sample. It is a perfect distemper for all purposes. It is made of the best materials and is of the highest quality. It is the only distemper that will stand the test of time. It is the only distemper that will stand the test of time. It is the only distemper that will stand the test of time.

Abraham Lincoln's Advice

With the approach of Spring, and a revival of business activity following a winter characterized by much unemployment and the necessity for the distribution of relief on a large scale by Governments, municipalities and charitable organizations, the air is filled with rumors of impending strikes and industrial disturbances. The coal miners of Canada and the United States threaten a walk-out, to enforce their demand for a six-hour day and a five-day work week, while the engineering and other trades in Great Britain are also resorting to extreme measures.

It would naturally have been thought that, instead of creating conditions which mean idleness, not only for those going out on strike, but for countless thousands engaged in other trades which are dependent upon a plentiful supply of coal, and instead of striving for less work and employment, the leaders of the various unions would have taken all the means in their power to create more work in order that, with the employment of all and renewed activity, there would be better times and a larger measure of prosperity for all.

However, it would appear that the fallacious teaching of paid agitators, that a restriction of working hours is the only way to secure better wages, inevitably provides work for a larger number, still influences many of the world's workers. The theory that the world must have a certain quantity of any given article, and that if each individual produces a smaller quantity of it, a larger number must be employed to make up the required total, is a false theory. It is possible to so enhance the cost of an article as to make it prohibitive, and to so restrict the demand for it, that instead of there being any increase in employment in such production, there is a damaging decrease.

Again, those who preach this false doctrine lose sight of the fact that mankind can get along without an amazingly large number of things if circumstances force them to do so. The experiences of the war should have been sufficient to thoroughly convince all people of this fact.

Last year the coal miners in Great Britain sought to dictate to the whole nation, and in tying up the coal mining industry they not only inflicted enormous losses on themselves, but dealt a blow at Britain's position as a great coal exporting country from which it has not yet recovered. Valuable properties were so seriously damaged that even yet they have not been restored to their old-time producing capacity, and fewer men are employed.

Canada's workers would do well to heed the advice once given by Abraham Lincoln, himself a worker and a son of the people. Lincoln said: "Property is the fruit of labor; property is desirable; it is a positive good in the world. That some should be rich shows that others may become rich, and hence is just encouragement to industry and enterprise. Let not him who is hopeless and helpless, pull down the house of another, but let him build one for himself, thus assuring, by example, that his own shall be safe from violence when built."

The man who gains a competence in this world, or amasses wealth, does not do so by working as little as he possibly can, or by skimping the work he does. The world's rich men are among its most industrious and hardest workers. Their aim in life is not to accomplish as little constructive, productive work as possible in the course of a day, but rather to strive for a maximum of results.

If men who now regard their position as hopeless, and are envious of the success of their fellows, would but follow Lincoln's advice and get busy and exert themselves, not as little as possible, but to the full extent of their powers, they could quickly establish themselves and make a worthy place for themselves in the world. But they will never get anywhere by simply criticizing what others do and striving to tear down what others have built up. They should change their tactics, and, instead of endeavoring to do as little as possible, and skimping that little, try the plan of exerting all their efforts and endeavoring to achieve a maximum of good work accomplished during the full period of a reasonable work day.

What this old world needs is not more spare time, more sport, more entertainment and pleasure, but more work, steady work, constructive and productive work. The busiest man or woman is the happiest, healthiest, most prosperous.

A Firm Foundation

France-British Alliance May Result in United Europe

We doubt if much good will come out of Geneva, but if France and Great Britain go there as allies there cannot be much harm. Adlai Hamilton remained in Constantinople long after authority had left his nerveless. This is simply owing to the jealousies of the European powers. Bolshevism in its turn will succumb when it finds itself face to face with a united Europe. A Franco-British alliance is the only foundation on which that unity can be built. London Morning Post.

Cause of Asthma. No one can say with certainty exactly what causes the establishing of asthmatic conditions. Dust, from the street, from flowers, from grain, from various other sources may set up a trouble, but it is sure to irritate, except through a sure prescription. Dr. J. I. Kellogg's Asthma Remedy. "A certainty may be said to exist, that there can be no uncertainty regarding a remedy which has freed a generation of asthmatic victims from this scourge of the human race. It is said everywhere."

Backward Children

The Value of Medical Inspection in Public Schools

Backward children are not always, perhaps not often, backward because of either mental deficiency or slothfulness, says the U.S. Public Health Service. Most of them are backward solely because of such ordinary and easily remediable defects as adenoids, near-sightedness, or bad teeth. A case in point was recently reported by the official representative of the Public Health Service in the eighth sanitary district of Vermont, in which the service is co-operating in a rural health work project.

Medical inspection of one of the graded schools in October, 1919, showed that it had been neglected necessary to instruct in a special room sixteen pupils who had seemed to be unable to keep up with their respective classes. Physical examination showed that each of the sixteen had some defect, hampering physical development. (Twenty enlarged tonsils, adenoids, defective hearing or eyesight) which, rather than any mental handicap, was the probable cause of their inability.

Through the co-operation of the school directors, the state was brought to the attention of the parents or guardians of the children and all were set right before the end of the year. On recommendation of the pupils the following (1920) it appeared that each of the sixteen previously backward children had caught up with their proper grades and were keeping up in them with their classmates. A year later, in December, 1921, some of these children were among the mental and physical leaders in their grades.

Canada Importing Pure-Bred Stock The importation of high-class pure-bred stock into Canada for breeding purposes, which was checked during the war, has again assumed considerable proportions. In the last fiscal year 279 horses were introduced, 833 cattle, 371 sheep, 110 swine and 16 goats. Though the United States supplied more cattle than the British Isles, the breeds represented in the male had a British origin.

Minard's Liniment for the Gripe and Stomach.

Jays of Rural Life

City Man Had Nothing on His Country Brother

A boy left the farm and got a job in the city. He wrote a letter to his brother, telling the jays of city life. It was a long letter.

"Thursday we sat out on the country club, where we golfed until dark. Then we motored to the beach for the weekend."

The brother on the farm wrote back: "Yesterday we haggled to town and haggled all the afternoon. Then we went to Ned's and poked until morning. Today we haggled out to the cornfield and geese-hunt until sundown. Then we suppered and then we slept for a while. After that we staid out to the corn field and bedded until the clock ringed."

Manlaughter in 2nd Degree

Using a razor—bad stuff—but many people do it for their corns. The only remedy that is painless and sure is Putnam's Corn Extractor, which does remove warts and corns, cleans them right off. Refuse a substitute for Putnam's. See everywhere.

Identifying it. Nina—Tom, isn't that the same suit you wore last year? Tom—Yes, and it's the same suit you asked me last year if it wasn't the same suit I had the year before—Harper's.

SPRING IMPURITIES DUE TO POOR BLOOD

A Tonic Medicine a Necessity at This Season

Dr. Williams' Pink Pills are an all-year-round tonic for the blood and nerves. But they are especially valuable in the spring when the system is loaded with impurities at the end of the indoor life of the winter months. There is no other season when the blood is so much in need of purifying and enriching, and every dose of these pills helps to enrich the blood. In the spring one feels weak and tired—Dr. Williams' Pink Pills give strength. In the spring the appetite is poor, the stomach and bowels are sluggish. It is in the spring that poisons and blood find an outlet in disfiguring pimples, eruptions and boils—Dr. Williams' Pink Pills clear the skin because they go to the root of the trouble in the blood. In the spring anæmia, rheumatism, indigestion, neuralgia and many other troubles are most persistent because of poor, weak blood; and it is at this time when all nature takes on new life that the blood most seriously needs attention. Some people do not know that these pills further weaken themselves. A purgative merely gallops through the system, emptying the bowels, but does not help the blood. On the other hand, Dr. Williams' Pink Pills enrich the blood which reaches every nerve and every organ in the body, brings new strength and vigor to weak, easily tired men and women and children. Try Dr. Williams' Pink Pills this spring—they will not disappoint you.

Sold by all medicine dealers or sent by mail at 50 cents a box or six boxes for \$2.50 by Dr. Williams' Medicine Co., Brockville, Ont.

It Will Prevent Ulcerated Throat.—At the first symptoms of sore throat, which presages ulceration, take a spoonful of the Thomas' Electric Oil. Add a little sugar to it to make it palatable. It will allay the irritation and prevent the ulceration and swelling that are so painful. Those who were periodically subject to ulcers of the throat made themselves immune to attack.

A course in the maintenance and repairing of motor cars is now on feature of one of the largest American colleges.

REMARKABLE LETTER

Canadian Woman Recommends Lydia E. Pinkham's Vegetable Compound

Winipeg, Manitoba—"I can not speak too highly of Lydia E. Pinkham's Vegetable Compound. I have done for me. I was a nervous wreck. I felt that I had to force myself to do my work. Life was a misery and work was a burden. Even the sound of my own children's voices made me feel as if I must scream if they did not get away from me. I could not even speak to my husband. The doctor said that he could do nothing for me owing to my condition, but told me to expect another miscarriage. My husband's grandmother advised me to take Lydia E. Pinkham's Vegetable Compound and started it right away and everyone noticed what a difference it made in me in a short time. I was able to do my work once more and it was a pleasure, not a burden. Now I have a fine home and I am able to do the doctor's own work. I am able to nurse her and enjoy doing my work. I can not help but recommend such a medicine, and anyone seeing me before I took it and seeing me now will know what I mean. What it has done for me it can do for anyone in the same condition. I am only too pleased for you to use my testimonial."—Mrs. Esther Davis, 721 McCre St., Winnipeg, Manitoba.

A Beautiful Complexion and Admiration

Ladies—A few days' treatment with CARTER'S LITTLE LIVER PILLS will do more to clear up skin than any other treatment.

The beauty treatment in creation acts in perfect combination with CARTER'S LITTLE LIVER PILLS.

Millions of people of all ages and both sexes take these pills for Biliousness, Constipation, Headache, Uterine Disorders, Pimples, Skin Eruptions, etc. They are the only pills of Canada. Small Pills—Small Dose—Small Price.

When Milady Goes a-Walking

Madame Fashion is very busy now preparing for spring, in spite of the gloomy winter weather. Here is a coat which she has designed for afternoon wear. The house back, which is quite new, and the color value is greatly enhanced by the self-toned embroidery.

For Scientific Research

Give Grants for Research on the Action of Alkali

The Saskatchewan and Alberta Governments and the Canadian Pacific Railway Co. have this year contributed \$1,000, and the Advisory Council on Industrial Research has contributed \$5,000 towards the research on alkali action through the ground water on concrete piping, piles etc. Already more than \$200,000 has been spent on this work by the Greater Winnipeg Water District Board. The City of Winnipeg recently made a grant towards the work of \$200. The action of alkali ground water on the concrete piping of the Greater Winnipeg Water District has already cost a great sum of money. The engineers have been compelled to put in a subsidiary pipe line to carry away the ground water.

Rate on Potatoes Cut

Practise potato growers will benefit at once by a reduced freight rate to points in Eastern Canada which came into effect recently. A lower rate to points in the United States will become effective on April 12. Professor F. W. Brodick, of Manitoba Agricultural College, received a wire from R. B. McIntosh, of the Department of Agriculture, Ottawa, notifying him of the reduction. According to Winnipeg freight agents the rate has been reduced from 71 1/2 to 66 cents a hundredweight—Free Press.

Rub It In for Lame Back.—A brisk rubbing with Dr. Williams' Electric Oil will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the liniment sinks in, the pain comes out and there are ample grounds for saying that it is an excellent article.

Near Dingent, in Germany, is a famous cave which will toss a sound to and fro no less than seventy times.

Lo-Coyles are to be found snails which attain a length of from four to five inches.

Use Minard's Liniment for the Flu

Railway Mileage

Saskatchewan Heads List for Increase Since 1911

An addition of 12,000 miles has been added to the railway mileage of the Dominion since 1911. Each of the provinces has had a share in this increase, even Prince Edward Island showing a gain of a little less than ten miles; but Alberta and Saskatchewan have head the list with 2,734 and 2,021 miles respectively. The total present railway mileage in the Dominion is 28,896 miles.

Oppose Skyscrapers for London

British Architects Disapprove of Altering Building Regulations

The proposal of the committee on London Building Acts to alter building regulations so as to permit the construction of buildings 120 feet high instead of the present maximum of 50 feet, has been disapproved by the Royal Institute of British Architects. Most of the architects who spoke on the question declared that "sky scrapers" in the mediocrity planned streets would be depressing and demoralizing, while the increase in the city's population would result in the swamping of traffic by the necessary supply services.

"They Certainly Did Help Me"

WHY PASCAL THEBAUD RECOMMENDS DODD'S KIDNEY PILLS

New Brunswick Man Now in Good Health Advises all Sufferers from Kidney Trouble to Use Dodd's Kidney Pills.

Village St. Jean, Kent Co., N.B. (Special).—"Dodd's Kidney Pills certainly helped me."

Such is the emphatic statement of Pascal Thebaud, a well-known resident of this village.

"I was very ill of kidney disease," Mr. Thebaud continues. "In the morning I was so weak I could not get up before mid-day. I took three boxes of Dodd's Kidney Pills and they did me a lot of good."

"Now an well again and I advise any person suffering from kidney disease to use Dodd's Kidney Pills."

Dodd's Kidney Pills are known in every corner of Canada as the reliable Canadian kidney remedy. They are known by the work they have done.

Ask your neighbors if Dodd's Kidney Pills are not the remedy for sick kidneys.

A devilish with tentacles eight feet long was landed at English Bay in Vancouver with a crab pot for bait.

Agricultural Committee Will Now Investigate Wheat Board Question

Ottawa.—Hon. W. R. Motherwell, minister of agriculture, has given notice of a motion in the House to refer the memorandum presented to the Dominion Government by the Canadian Council of Agriculture regarding re-establishment of the Canadian Wheat Board to the committee on agriculture.

Some days ago the Prime Minister announced that this course was intended. The agriculture committee will this year consist of 105 members, of whom 25 are from the Progressive and Independent in the House and the balance Conservatives and Government supporters. Prominent men on the committee include—Hon. Charles Stewart, minister of the interior; Hon. W. R. Motherwell, minister of agriculture; Hon. J. E. Sinclair, Hon. S. F. Tolmie, Hon. T. A. Crenier, Hon. H. H. Stevens, as well as members of all three parties who are practical agriculturists themselves.

The average strength maintained on committees this season is five Liberals to four from the two Opposition parties.

Western Members of Parliament have but two main strings to their bow at this session of Parliament. They want the wheat-board established and no action taken in renewal of that section of the Railway Act, which overrides the Crow's Nest Pass rate agreement. With this they will be satisfied. If there are any tariff changes they will be regarded as so much good measure.

Respecting the rates question, negotiations started by the Government are now in progress both with the Canadian Pacific and Canadian National Railways, looking to a reduction of freight rates on all basic commodities and it is believed that this will be successfully brought about.

British Submarine Lost

H-42 Collided With Destroyer in Mediterranean

London.—The British submarine H-42 has been lost with all hands in the Mediterranean, says an Exchange Telegraph despatch from Gibraltar. She collided with a destroyer during manoeuvres.

The destroyer was the Versatile. The latest naval list says the submarine, commanded by Lieut. Douglas Sealey, had a complement of 23 men.

The British submarines of the H class were all built under the war emergency programme of construction in the years 1915-19. They are of the single hull "Holland" type modified by the admiralty, 164 to 171 feet long and 15½ feet beam. They displace from 440 to 500 tons and are equipped with two sets of diesel engines, giving a speed of thirteen knots on the surface and carrying four torpedo tubes. Their ordinary complement is 22 men.

Tidal Wave Floods Venice

Water Rose to Over Three Feet in Public Squares

London.—A Central News despatch from Venice states a tidal wave inundated the city, the water rising to a depth of more than three feet in some of the public squares of Venice, situated as it is virtually at sea level and threatened by canals, is subject to periodic inundations, due to unusually high tides and spring freshets. The squares such as St. Mark's are under water at such times, but the rise seldom exceeds a few inches.

Here Kong has a slave colony where girls are sold as low as \$5 a head.

CANADA MUST GUARD AGAINST DISEASES

CHOLERA AND TYPHUS MAY SPREAD THROUGH RUSSIAN IMMIGRANTS

Berlin.—Canadian and the United States as well as Central Europe must be on guard against the introduction of cholera and typhus through immigration of Russian refugees, says a warning issued by Dr. A. Schlegel of the German Red Cross. Hosts of these refugees are pouring into Germany over the Polish, Latvian and Estonian borders, and many are seeking passports to Canada or the United States, where they have relatives and friends who are financing them for the journey.

Already nearly 50,000 cases exist in Germany, traced to refugees, and German immigrants from the Volga region have been found to be infected.

"The German and Polish Governments recognize the danger, but cannot head it off. We can only lessen it, and the necessity of doing this led to the calling of the typhus conference in Warsaw," he said.

Staff Officers Should Not Be Dismissed

Sir Arthur Currie, Advocates Care in Military Economy

Montreal.—Care in economizing in the military department was urged by Sir Arthur Currie, principal of McGill University, in discussing abolition of the posts held by Sir Henry Dunsford and General Gwiltin as heads of the Canadian militia and air forces. Economy might be justified, he said, by results of the Washington conference and the prospect of an end of the Irish grievance, but the Government should not surrender to the popular prejudices against staff officers who were much harder to train than the fighting man, he thought.

"No country," said Sir Arthur, "which has participated in a world conflict can afford to do away with its military organization."

Useless to Oppose Trade With Germany Says Premier Hughes

London.—The uselessness of maintaining a policy of opposition to resumption of trade with Germany, a course which had already been abandoned by the rest of the world, was dwelt on in a speech by Premier Hughes of Australia, according to a Reuters despatch from Melbourne. The premier added that Australia wanted markets for its primary products of which Germany was a large purchaser, especially of coarse wools. He declared that German competition in the wool market, though not necessarily purchased, made a difference of between 3 and 4 millions sterling to the Australian growers.

Federation Will Aid Miners

New York.—The general strike of anthracite and bituminous coal workers, set for April 1, will be prosecuted "with the fullest and most effective co-operation of the American Federation of Labor," it was announced after a visit to mine officials of envoys of Samuel Gompers, president American Federation of Labor.

It pays to patrolize home industry. Buy from the merchants in your own town.

British Officers for B.C.

Young Officers from India May Settle on Land in British Columbia

Victoria, B.C.—Major J. W. Clark, in charge of soldiers' settlement work under the department of lands, will leave soon for India.

Several hundred young British officers are being paid out of the Indian army, and at present the British Government is making arrangements to assist their assimilation into civil life in various parts of the Dominion. All of these young officers will have from two to three thousand pounds each.

A few days ago the India office in London cabled the Provincial Government and offered to pay half the expenses of sending a British Columbia representative to India to interview these young officers with the idea that they would come direct from India to British Columbia. It is the intention to place them, if satisfactory arrangements can be concluded, upon lands in the South Okanagan irrigation project.

Asks Information On Natural Resources

J. F. Johnston Aids Enquiring About Government Merchant Marine

Ottawa.—The operation or non-operation of the vessels of the Canadian Government Merchant Marine is to come up under question in the House of Commons as a result of a series of enquiries filed by J. F. Johnston, last Mountain, the chief whip of the Progressives. Mr. Johnston has given notice that he will ask the Government to state how many vessels of the merchant marine fleet are being operated and also the average cost per day of the vessels when they are not in operation.

Mr. Johnston also asks for information on the proposed conference regarding the return of natural resources to the western provinces. Mr. Johnston has given notice that he will ask the ministry to state the total acreage and value of lands held by the Dominion Government in Saskatchewan and Alberta from September 1, 1905 to September 31, 1921.

Further Conference On Embargo Favored

Cities of Great Britain Asked for Views on Matter

London.—Representations on the subject of the importation of Canadian steel cattle have been addressed to the city of London by the Aberdeen County Council, Edinburgh and Glasgow City Councils and the Parliamentary Committee of the co-operative congress as well as other bodies, in favor of a further national conference being called by the Lord Mayor at the Guildhall. The cattle markets' committee of the corporation of the city of London has now communicated with all the cities in Great Britain with a population of 35,000 and upward inviting their views on the matter.

Urges Wireless Chain

London.—The Council of the Empire Press Union passed a resolution deploring the lack of adequate telegraphic communication and urgently pressing the government to immediately carry out some scheme for an imperial wireless chain obtaining general approval throughout the empire.

May Send Troops to Ulster

London.—The British Government may have to consider whether it will be possible to place a cordon of Imperial troops between the warring elements on the Ulster frontier, Winston Churchill, the colonial secretary, stated in the House of Commons.

Mennonites Send Relief

London.—Provisions worth 18,000,000 roubles will be sent into the drought district of the Ukraine by the Mennonites' Famine Relief organization under an agreement just concluded, says a Moscow despatch to the Russian trade delegation here.

Lords' Vote Defeats Government

London.—The Government was defeated in the House of Lords by the adoption of an amendment to the Irish Free State Bill to guarantee pensions to Irish civil servants. The vote was 42 to 40.

Attorney General Wants to Know How Law Stands Regarding Export

Toronto.—Two recent liquor seizures at Oakville and Hamilton have given rise to an announcement by Attorney General W. E. Roney that a highway in Ontario will be confiscated and held until such time as the courts pass upon the legality of conditions under which they were in transit.

Mr. Roney said that it was his intention to learn exactly how the law stood in regard to the export of liquor in order to do this he would present a test case to the highest court. He intimated that legislation might be brought to bear immediately in regard to the present wholesale transportation of liquor, it not being necessary to await the final decision of the courts in this respect.

Winning Churchill Says Britain Leads Separate Air Ministry

London.—During the House of Commons debate on the air force estimates, Winston Churchill, secretary for the colonies, stoutly defended the need of a separate air ministry and said that Great Britain's insular position had largely disappeared, making progress in air navigation of the highest consequence, not even second to the navy. The vital sea battles of the future would, he said, be fought by airplanes from ships.

Mr. Churchill announced that a committee has been established to examine the relations of the air ministry to the admiralty. A sub-committee of the committee on imperial defence was also being established to enquire into the question of creation of a common brain for the three services while another committee would examine on which question the pooling of the administrative services on all three services depended. Thus the question of establishing a ministry of defence is reaching the threshold of practical politics.

Extending Paper Mill

Work Being Commenced on Building at Port Arthur

Port Arthur, Ont.—A. G. Pounford, manager of the Port Arthur Division of the Provincial Paper Mills Limited, announced the actual commencement of work on the construction of a paper mill extension to the company's present plant.

The extension is to be completed by May 1, 1923, and at an estimated cost of \$1,500,000. The mill will be equipped with one 146 book machine capable of turning out thirty tons of book paper a day. The main market for the product will be Western Canada.

Propose Soviet Bond Issue

That the Russian Soviet Government should issue bonds covering the whole of Russia's indebtedness is understood to have been the British proposal at the first session of the allies' technical experts meeting here to prepare an agreement for the conference. Bonds not only covering all of Russia's national debts but also municipal and individual loans to the old and new Russian regimes are understood to have been included in the proposal. The bonds would be exempt from interest for five years. Discussions concerning Russia are featuring the conference of the experts, although the Soviet Government is not represented in London.

Paid for Occupation in Germany

Ottawa.—In the Senate, in answer to a question by Hon. Mr. Green, Senator Dandurand stated that Canada had received through the British authorities \$6,214,500 in payment of the cost of the Canadian army of occupation in Germany. The amount to be received from the German reparations commission had not been fixed.

Against Daylight Saving

Ottawa.—Daylight saving is apparently to be a bone of contention in the present session of parliament. Fred Kay, Liberal for Mistisqui, Que., has given notice of a resolution that, "in the opinion of this House, it is desirable that legislation be introduced during the present session to prohibit the adoption of daylight saving time in any part of Canada."

Ulster Will Impose The Death Penalty For Bomb Throwing

Belast.—The House of Commons of the Ulster Parliament has added a new clause to the Restoration of Order Bill authorizing the imposition of the death penalty for bomb-throwing.

The attorney-general, supporting the amendment, said he was prepared, "these special powers proved inadequate to advise the Government to extend the death penalty to other offenses, such as bearing arms without a permit."

FORMER COLEMANITE

SOAKED \$1,000.00

John Dimie, who for a number of years conducted a grocery store at Coleman and but recently moved to Macleod, appeared before Magistrate Macleod on Monday charged with having liquor for sale. Samples had been sent to Edmonton for analysis and proved to be considerably over proof and Dimie was found guilty and required to either pay a thousand-dollar fine or go to jail for three months with hard labor. He decided to pay the fine.

HOCKEY CLUB WIND UP SEASON

The Blairmore hockey club held the last meeting of the season in the arena last Sunday afternoon. The minutes of the previous meeting were read and approved and a vote of thanks was then passed to Mr. Charbonnier for the cup and his generous donations; the Football club for the use of their sweaters; the officers for their untiring efforts, and last but hardly least, The Enterprise and Press for support accorded during the season.

The financial statement for the year was then presented and it showed a very good sized credit balance. Mr. Bird was commented for the excellent manner in which he had kept the books of the club. Two members also showed appreciation of the fact that a balance was on hand for next year.

The election of officers then took place. They are as follows:
Honorary President—Mr. J. Charbonnier.
Honorary Vice-Presidents—P. M. Christophers, M.P.P., Harry Burns, J. P. O'Neill.

President—W. H. Chappell.
Vice-President—L. L. Morgan.
Sec.-Treas.—W. Bird.

It speaks highly of the officers to note that they are the same as last year. It was explained that by electing officers at this time, they could try and keep track of the team and have them all resident of town before August 1st, so that it would be complying with the Allan Cup rules. That was the reason the winners this year could not compete for the Allan Cup.

The club wish, also, through The Enterprise, to thank very heartily those who contributed so freely at the first of the season and also the general public for their very generous support.

DEATH OF MINNIE CERNEY

The death occurred at 5 o'clock last evening at Frank, of Minnie Cerney, aged eighteen years.
Miss Cerney developed a severe type of tuberculosis and was ill but a few months. She leaves to mourn her loss, a father, three sisters and one brother.

Interment will likely take place at Blairmore on Saturday.

Blairmore light for last month showed a surplus of revenue over cost of about \$315.

One local young lady is so anxious to get married in June that she has torn April and May sheets off the calendar.

Schools are probably to blame for the adoption of the abbreviated dress by young girls. Did you ever notice that a school girl writes hastily and uses abbreviations freely?

MINNIE RESCUE EXAMINATIONS

Examinations for mine rescue certificates, conducted by Duncan McDonald, Esq., of Calgary, general superintendent of Mine Rescue and First Aid for the Province of Alberta, will be held at Coleman in the building next to the International Coal Co's washhouse, on Tuesday, April the 4th, commencing at 10 a. m. prompt; also at the office of the West Canadian Collieries, Blairmore, at 3 p.m. of the same day; and at the office of the West Canadian Collieries, Bellevue, on Wednesday, April the 5th, at 10 a.m., and the school house, Hillcrest, at 2 p.m. of Friday, April the 7th.

Candidates must be holders of First Aid certificates issued by the St. John Ambulance Association, or some other recognized association in First Aid, or have taken a course in First Aid and awaiting certificate.
ED ROYLE, Supt.,
Mine Rescue Car No. 1.

The reason the setting sun this time of the year is so red is because it has to blanch at the first appearance of the low necks and high skirts.

The figures of the new assessment of the Blairmore area—School District No. 628, \$1,563,175.00; Town, \$397,700.00. The tax rate should be low.

Joe Kramer, formerly with the Alberta Government Telephone repair gang in Blairmore, but of late residing in the Vulcan district, is renewing old acquaintances here.

According to the report submitted to the council by the electrician on Monday night, the high power service line is in fair condition, but the low tension lines need attention. He also reported having discovered lamps being used in a number of homes, where the current was not passing through the meter.

We must expect on Monday night an asked if the report that he was dead was true. He replied, "No, I'm not dead, but awfully dry!" Just then a change in the weather took place.

Warren G. O'Leary, manager of the Eastern Hat & Cap Company, Ltd., Toronto, Nova Scotia, died in a Montreal hospital last week under rather sudden circumstances. He was the founder of the above company some 20 years ago and was looked upon as one of the most capable and prosperous business men in the maritime provinces.

There was a young girl in the choir, Whose voice rose high and bold.

Till it reached such a height, And they found it next day in the choir.

Teacher—"Now, Robert, tell me what an engineer is?"

Robert—"He is a man that works an engine."

Teacher—"Correct. Now, tell me what a pioneer is?"

Robert—"He's a man that works a piano."

Who Knows

"Ferdie invites you to go with us on his yacht."

"With not a drop of oil? Six for me."

"You are foolish. Who knows what may happen beyond the three-mile limit?"

The Telephone's Complaint

I am a telephone. While I am not broke, I am in the hands of a receiver. I have a mouthpiece, but, unlike woman, I never use it. Follows me me to make dates with girls and girls use me to break said dates. Husbands call up wives over me and wives call their husbands down over me. I never get to go anywhere, but sometimes the company takes me out—it all depends on whether you pay your bill or not. I am not a bee, but often I buzz in your ear. I am the bell of the town, and while I don't get jewelry, I often get rings. Whether I do anything or not, a lot of people often call me to the wall. I like music, but the music I hear is chime music. I get all the popular airs, and the most popular one is not air—Exchange.

J. P. Gregory's store at Brockton was burned to the ground on Wednesday morning of last week.

The Greek Catholics will build a church on Ninth Avenue North, Lethbridge.

See the full page ad. of Fred Thellert's store in this issue. Their offerings will greatly interest you.

Twenty-five law suits on the fourth day of spring drew our mind completely from the hereafter that in a premature few of us.

The old adage: "Six days shalt thou labor" will be forgotten, with the mists for a while, and be substituted with "For quite a while we shall not labor!"

Butterfingers, who still have large quantities of liquor on hand, are hoping soon to compete with the winterwear and manufacturers in entering to the general store.

Mrs. Kuentz, an elderly Belgian lady, passed away on Thursday last following a prolonged illness. Interment took place at the general Protestant cemetery on Saturday afternoon.

Pat, who was taken up on charge of murder, was shown a number of trees, and was asked by the hangman which of the trees he wanted to be hanged on. Pat pointed to a berry bush, hanging—"But that's too small!" Pat—"Oh, begorra, O'm in no hurry. O'd wait till it grows."

The next household luxury is predicted to be the radio phone. It is said the farmer and his family will hear on Sunday evening inspiring church music and great sermons, and on week day nights the best that is going vocally and instrumentally.

The Montreal season for ocean liners will commence with the sailing of the "Scandinavian," on May 4, bound for Southampton and Antwerp. She will be followed on May 5 by the new "Montcalm" for Liverpool, and on the following day the "Montreal" will sail for Naples and the "Metagama" for Glasgow. Throughout the season there will be sailings every few days from Montreal for the various British and continental ports.

Card of Thanks

Mr. and Mrs. Chiarovanni, of Bellevue, wish to thank all those who have sympathized with them in their recent bereavement.

To the teacher and classmates of their deceased daughter in the public school; to the scholars of the Methodist Sunday School; to the L. O. O. F., and to the many other friends whose kindness was so manifest on this occasion, the deepest thanks of the bereaved parents and sisters are here expressed.

G. AND M. CHIAROVANNI
AND FAMILY

In the land of opportunity, the humblest can work up to a twelve cylinder case.

A boy at the local school figures that a choir has twenty-five voices—claiming that a quire is 25.

One effect a prospective strike has is to cause the markets to become so saturated with coal as to kill all chances of further markets for several months.

A community that waits for the government to help it without the people themselves looking up to help it along deserves to blink in the old run.

Mr. Payne, of The Coleman Journal, tramped to Blairmore and returned in the storm of Sunday morning last.

Mr. and Mrs. Percy Bamber, who have resided in Nelson for some time, have taken up residence in Lethbridge, and spent Sunday enroute with Mr. and Mrs. Purvis here.

Messrs. June & Yat have taken over the Club Cafe at the corner of Fifth Avenue and Victoria Street. They have had the place thoroughly renovated and are open for business under the style of The Blairmore Cafe.

The members of the Bellevue hockey team and officials of the club will be entertained at a dance and supper by Mrs. Callan at the Bellevue Inn, tonight, in honor of the success of the team during the season just closed. Bellevue hockey team are the holders of the provincial amateur hockey championship.

This Town Needs a Hupmobile Dealer

This is a "Hupmobile town" and it needs, and will soon have, a Hupmobile dealer.

It is the kind of community that most appreciates this fine car.

The Hupmobile, while ranking with cars that cost more money sells at the remarkably low price of \$1975 f.o.b. Calgary.

This brings it within the reach of persons of ordinary means, and makes it a wonderful proposition for the dealer.

The man we are looking for to represent the Hupmobile here, is a hustler and a good business man.

To such a man, we can practically assure many prospects, sales and exceptional profits.

This is the first year we have been able to supply the great potential demand for Hupmobiles outside of the metropolitan centres.

Now the Hupmobile factory has greatly increased its production to supply this demand.

This creates a money-making opportunity. You may be the man we want.

Remember that we have no back-breaking requirements—nothing but what will enhance your bank standing. And our discount rate is much more liberal than is ordinarily offered.

It is unmistakable to your advantage to talk this over, absolutely without obligation. Let us hear from you at once.

Reasonable bank credit and moderate initial investment required.

Chief Pegowis

Famous Indian Chief of Red River
Who Was the Friend of the
White Man

In his memoir of Archibald Cochran, Sheriff Inletter pays tribute to a noble Indian, who, after the battle of Seven Oaks in 1816, saved the Red River settlers from extermination. Chief Pegowis had it in his power to destroy every member of the Selkirk community.

"Had he done so?" says the Sheriff, "without doubt he would have been liberally rewarded by the leaders of the North-West Fur Company. But he stood aloof, kept his warriors in hand, and gave protection to the men, women and children of the settlement."

If the Selkirk settlers kept this potentially rich country for the British, what place in history has Pegowis, who saved those settlers from annihilation? The Lord Selkirk Association proposes to perpetuate his memory by erecting a suitable monument as the names of Brant and Tecumseh have been honored. For he was of that calibre, and he belongs to their high company. One of the ironies of paradoxes of appellation that Pegowis or Peguis as the name was, signified "destroyer." But whatever was in the mind of the warrior who gave him this name, the child grew up a strong, shrewd, industrious and right-thinking man, and came to the Red River with a small following became Chief of the Saulteaux, and of the Swamp Cree from Norway House and York Factory north.

In 1820, when camped near Lake Winnipeg, he welcomed and took salt with the Rev. John West, then making the inland voyage up the Red River from the lake, to wards the Mission which grew into the great Diocese of Rupert's Land. "I wish," said the Indian, "with the courtesy and dignity of his race, that more of the stumps and brushwood were cleared away for your feet on coming to see my country."

When Mr. West arrived at his destination he was given to read a testimonial, signed by Lord Selkirk, attesting to the Chief's services in the interest of peace and order, and advising officers of the Hudson's Bay Company to treat him with favor and distinction. Eighteen years later, Sir George Simpson, then Governor in Council and the exchequer, with an added substantial appreciation in the form of a pension. And we find that twelve years later still, at a great age and with unabated fervor and the "quick eye" of the Red River, he paid a visit to one of the missionaries, coming, as he said, "to talk about things of the deepest interest." They concerned his own faith and the new religion—more light and fuller; and he craved for his people, the adherents of the church. Pegowis died in 1864 and two Archdeacons officiated at his funeral.

This is the Chief who, coming West for such a time and proving a factor of some moment in the history of the Red River of the North, this is the Chief and this is the man who deserves at our prosperous hands a memorial in stone. The Lord Selkirk Association would do well to make the appeal a popular one, not forgetting the school children, and for many societies and clubs in our midst which exist for the obvious promotion of a strong intelligent Canadianism. "Many a mickle makes a mickle."—Free Press.

Population Increased 22 Per Cent.

According to Last Census Saskatchewan is in Lead

The total population of Canada in the census of 1921, according to figures just issued is 8,789,489 compared with 7,206,642 in the census of 1911, an increase of 1,582,846 for the ten years, or nearly twenty-two per cent. Nova Scotia shows an increase of 6½ per cent. New Brunswick, 10 per cent.; Quebec, 17½ per cent.; Ontario, 10 per cent.; Manitoba, 34½ per cent.; Saskatchewan, 50 per cent.; Alberta, 55 per cent.; British Columbia, 35 per cent.

Fur Catch Will be Valuable

From the beginning of winter until the end of January, the total estimated value of \$1,000,000 passed through the Fur, which is in excess of the value of any similar period since the construction of the Hudson Bay Railway. Furred animals are very plentiful this year, and there are a great number of trappers out and it is anticipated that the aggregate catch in the district will reach a value of \$2,500,000.

The Auto Industry in Canada
There are ten companies manufacturing cars in Canada and 5,500 dealers. Eighty thousand persons find work in automobile plants, and indirectly the well-being of 400,000 persons is involved. The capital invested in dealers' companies is \$2,000,000 and in manufacturing \$110,000,000. The total value of passenger cars alone produced in Canadian plants in 1920 was \$54,000,000.

W. A. U. 1412

Canada's Exports to Britain

Live Cattle, Wheat, Oats and Flour
Show Big Increase

Canadian Trade Commissioner Harrison Watson, writing from London, points out that possibly the most interesting development of 1921 was the revival of the live cattle trade, which amounted to \$6,674,000, against no arrivals in 1920. Of this number Canada supplied nearly all, the balance being from the United States.

A brief survey of the imports into Great Britain during 1921 shows that, while there was a reduction in comparison with 1920 of nearly 30,000,000 cwt. in the total of wheat, Canada's share actually increased 4,000,000 cwt. or nearly 50 per cent. Canadian shipments of oats increased five-fold, from 697,500 cwt. in 1920 to 3,291,500 cwt. in 1921. Canada headed the list in the shipment of oats to the Mother Country. Another development was the heavy increase in the deliveries of Canadian flour, which brought them within reasonable distance of United States shipments.

There was a heavy decline in shipments of Canadian bacon, amounting to nearly 50 per cent., mainly due to the revival of the bacon trade with Denmark. Against this imports of Canadian hams into Great Britain increased from 25,706 cwt. in 1920 to 92,906 cwt. in 1921.

German Vessels Often Carry Contraband

Customs Officers Now Search Ships Entering the Thames

Every nook and corner of German ships entering the Thames are being searched by customs officers.

Even the coal in the bunkers is hoisted about to make sure there is nothing there besides coal, that smuggled spirits or the good old German favorites, watches!

This is the sequel to a peace epidemic of smuggling. Germans are far away the worst offenders in this offense against the country's revenue. They say quite frankly, that at the present rate of the mark it is impossible to ship in foreign-goods vessels unless something of the sort is done.

Their pay is all right in German money, but they have to work for a month in order to buy a meal in a foreign port.

On the other hand, this same law mark permits them to make very large profits if they are successful in smuggling spirits or watches.

The Norwegian boats, loaded so badly from smuggled goods that they are exercising the limits of their powers and seizing sea ships as well as imprisoning the offenders.

Our Competitors Are Armed

A National Research Institute for Canada Seems Timely

Knowledge is the great weapon of modern trade. To get it Great Britain has the National Physical Laboratory at Teddington, near London. Germany has two research institutes, one physical and the other chemical.

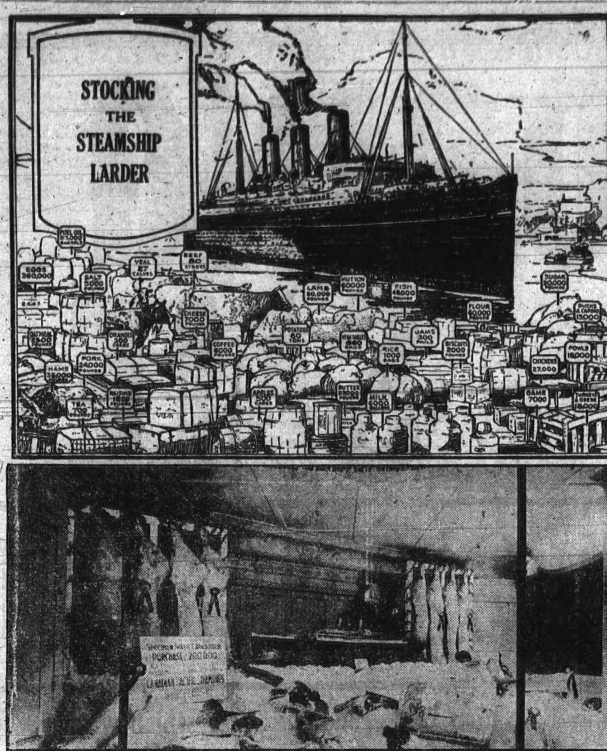

In France and Italy measures being taken to organize research institutes. The United States has a National Bureau of Standards at Washington to which is also now attached a simple accommodation of devoted to industrial research. The amount spent by the Bureau exceeds two million dollars a year. The Commonwealth Government of Australia is establishing an institute of science and industry. An institute for research known as the Cawthron Institute is being established at Nelson, New Zealand, by private benefaction. Japan is founding a National Research Institute, for which already ample funds have been obtained from the Emperor, the Government and from private sources. But Canada has nothing! That is why the proposal of our Ottawa working Scientific Research at hand to create a National Research Institute for Canada seems timely.

Dehydrating Food at Home

Preservation of foods in the home by dehydration has been made possible, says an illustrated article in the April Popular Mechanics Magazine, by the production of an ovenlike arrangement manufactured by a New York company. In operating, a number of trays containing the food to be dehydrated, are placed in the apparatus, while underneath there is a fan, or blower, having a certain amount of water in it, and which has been previously heated to the proper temperature.

Ontario's Corn Crop

The corn crop of Ontario for 1921 is estimated at 29,313,861 bushels, an average of 81 bushels per acre and 5,015,082 tons of green fodder corn at an average of 11½ tons an acre, according to the Provincial Department of Agriculture. The first wheat crop amounted to 13,667,872 bushels, an average of 22 bushels an acre.

Exhibition in Montreal of steer carcasses weighing 200,000 lbs. and game, to be used on the winter cruises to the Mediterranean and West Indies by the Canadian Pacific Steamers, "Empress of Scotland," "Empress of France" and "Empress of Britain."

Recently prize beef was placed on exhibition in Almy's window, near St. Alexander Street, Montreal, purchased at the Toronto Christmas show for use on the forthcoming cruises of the C.P.S.L. steamers "Empress of France," "Empress of Scotland," and "Empress of Britain." It was arranged by the Canadian Pacific Steamers, Ltd. The carcasses, all Canadian raised stock, are of exceptional quality. For three cruises the requirements in beef are approximately 175,000 pounds, or in other terms 235 choice steer carcasses with a dressed weight of 750 lbs. each. The turkeys, chickens, capons, ducks and geese have been specially fattened for the particular requirements of these cruises, and no cold storage stock of any kind is to be used. The different kinds of poultry are also of uniform weight and dress.

In general the requirements for the

"Empress of France," "Empress of Scotland" and "Empress of Britain" are as follows:

Milk	6,000 gallons
Turkeys	18,000 lbs.
Chickens, fattened	15,000 "
Chicken, broilers	12,000 "
Capon	15,000 "
Fowls	18,000 "
Ducklings	9,000 "
Game, assorted	7,000 "
Lamb	30,000 "
Mutton	40,000 "
Pork	24,000 "
Pork Loin	6,000 "
Racon	60,000 "
Ham	35,000 "
Eggs	360,000 "
Butter	27,000 "
Milk	6,000 gallons
Cheese	7,000 lbs.
Cream	8,800 "
Coffee	6,000 "
Sugar	30,000 "
Flour	60,000 "

Potatoes 60 tons
Turnips 5,000 lbs.
Carrots 7,000 "
Cauliflowers 180 dozen
Celery 240 "
Cucumbers 20 "
Cabbage 360 "
Egg Plant 400 "
Lettuce 180 dozen
Onions 7,000 lbs.
Spinach 900 "
Tomatoes 1,500 "
Fish, assorted 45,000 "
Apples 500 cases
Bananas 1,000 lbs.
Grapes 100 cases
Lemons 45 "
Oranges 300 "
Pears 3,000 lbs.
Grapes 3,000 "

In addition to these quantities, special fruits and tropical delicacies will be purchased at different ports on the cruise.

Something for Nothing

Necessity of Giving Useful Service in Return for Money

The Toronto man who lost \$3,000 in a confidence game recently revealed a weakness as ancient as human nature itself. In this particular case the victim placed some money between two boards and expected to see it double itself, as a rabbit comes out of a conjuror's hat. He tried to do stupidly what many other people are always trying to do with varying degrees of cleverness—get something for nothing. It is a passion as old and as wide as the world. The census pretends to set down the occupation of every citizen but it omits a large classification, composed of those who are striving to make money without giving society any return for it. The idea that there is no moral duty or necessity of giving useful service in exchange for money is at the root of many social and economic ills. The dupe who lost the savings of a lifetime under the delusion that he could multiply them by a stroke is on all fours with many who are more astute, but not really more respectable. — The Toronto Globe.

A Case of Bronchitis

A certain French Canadian, whose knowledge of the king's English was rather sparse, was invited to stay a few days with some English-speaking friends in Montreal. On his arrival the following conversation ensued:

"Comment ça va, Pierre. How are you?"
"Well, my fren, I don't feel very good. I have a little house on the Frost; in fact I have a cold."—Saturday Evening Post.

The wild wars are like some people—they make a lot of noise and say nothing.

Revenue from Income Tax

Asks Information on Income Tax Revenue and Collection Costs

The country's revenue from the income tax and the expenditures necessary to collect that tax are made the subject of questions which are to be placed before the Government by H. Martell, Liberal member of Hants, N.S.

Mr. Martell has given notice that he will ask for a return showing the amount, if any, collected during the fiscal year 1920-21 as income tax and also the total amount expended in the way of salaries and for all other purposes in connection with the collection and assessment of such income taxes. Mr. Martell also asks for a statement showing the number of persons employed in connection with the assessment and collection of the income tax throughout Canada.

The Tale of a Shirt

One story told of a prominent parliamentary man, concerns a person which he was supposed to speak at a meeting in a small West-end town. On account of a cloud-burst, however, there was a wash-out on the railroad. So he telegraphed to the committee: "Cannot reach you in time. Washout on the line." Back came the reply: "Never mind your wash. Buy another shirt at our expense and come anyway."

Airplanes May be Used

Aeroplane are the latest discovery of the Manitoba Treasurer, on which he can levy in filling the Provincial coffers. Hon. Dr. J. W. Armstrong, Provincial Secretary and Minister of Municipal Affairs, Winnipeg, announced that an amendment would be brought down to the Motor Vehicle Act providing for a tax of \$20 on all aeroplanes in the province.

Acres Cultivated in Manitoba

Agriculture Department Says Average is Maintained This Year

That there will be 4,802,000 acres in Manitoba ready for the plow this spring, is a statement made in a report issued by the Provincial Department of Agriculture. This acreage is well up to the average.

There is a large increase in the demand for tillage implements this spring, according to R. Rice-Jones, general manager of the United Grain Growers, Ltd. He stated that implements in demand included seed drills, plows, harrows, disc-harrows, etc.

Figures obtained from the agricultural department show that in 1921 Manitoba land was cultivated in preparation for the 1922 crop as follows: New breaking, 155,000 acres; summer fallow, 1,612,000; fall plowing, 3,132,000; total, 4,902,000 acres.

Popular Automobile Route

With the completion of fifteen miles between Banff and Windermere, which will be finished this year, the 4,400 mile Blue Trail which stretches from California up through McLeod, Lethbridge, Calgary and on to Banff, Lake Louise and Windermere, and so to the Crow's Nest Pass and back to the States, will be finished. It is expected that this will prove to be the most popular automobile tourist route on the continent.

In the Andaman Islands the eating of a live rat is deemed a test of manhood, and an man is permitted to marry until he has accomplished this feat.

Wheat Yield

Intensive Cultivation of Small Area More Profitable than Big-Share Methods on Larger Field

Statistics concerning the fecundity of animals and plants possess a fascination for jugglers of the figures. Cheerful romancers tell us that if all the spores of all the puffballs produced puffballs and none was wasted, sooner or later the earth would puff itself to the limits of the solar system, finally to engulf the Pleiades and another dog star. And if all the eggs of all the codfish were to hatch and still more cod a man flying from the earth with the velocity of light would eventually be overtaken, salted and pickled in a universe of cod. Such is the romance which the statistician who uses his imagination unrelents about fecundity.

Nevertheless some practical lessons concerning the fecundity of wheat were recently illustrated in a striking manner at the school of agriculture at Valldal, Spalg. Selected wheat was planted grain by grain, and two crops were grown from the original seeds. In the first crop each kernel developed an average of 20 shoots producing 65 kernels each. The second crop averaged eight shoots, each producing 50 kernels to the head. That is, the original kernel produced 312,000 other kernels.

Of course, such a yield cannot be obtained in an ordinary crop. Comparative statistics show nevertheless that in the United States the yield to the acre may be materially increased. In 1920 the average yield to the acre in Arkansas and Tennessee for 1920 was 6.5 bushels; but in 10 other States the yield average was more than twice as great. In the last 50 years, taking 10 years averages, wheat production has increased from 12.2 to 14.4 bushels to the acre. In 1860 the average was less than 10 bushels; in 1915, the banner year, it was 17 bushels.

The yield of wheat or of any other grain involves several factors. The science of soil, of cultivation and of climate is pretty well understood. The wheat farmer has learned that the mineral elements and the nitrogen which the wheat takes from the soil must be replaced or the crop fails. He is learning that the intensive cultivation of a small field is more profitable than silphoid cultivation of a large field. It means the difference between the 14 bushel crop of the United States and the 30 bushel crop of the British Isles.

Not so much is known about the seed, however, and an important element of a selected seed is fecundity. This characteristic is hereditary. The corn farmer has learned this fact and he is making the most of it. The seed which will reproduce more than 700 of its kind is to be preferred to that which, other things being equal, will produce only half as many.—The New York Herald.

Livestock Prices Improving

Gradual Rise in Prices is of Interest to Farmers

Every farmer and breeder will be interested in noting the gradual rise in prices that is taking place in livestock. The following figures taken from the weekly report of the Livestock Branch at Ottawa are encouraging trend. Taking the average prices that prevailed in November, 1921, and February, 1922, at the five principal markets of Canada, namely, Montreal, Toronto, Winnipeg, Calgary and Edmonton, the gain found that they compare thus: Steers, 700 to 1,000 lbs., good, \$4.29 to \$5.84; heifers, \$4.34 to \$5.71; butts, \$2.69 to \$3.65; cows, 3.50 to \$4.78; calves, \$5.51 to \$8.47; hogs, select, \$5.83 to \$12.35; lambs, \$7.58 to \$10.40; and sheep \$4.16 to \$5.52. It must be understood that these prices are the average at the stockyards of the whole country and are for good animals every case. Of course prices are higher in Montreal and Toronto than in the west.

Seal Hunters Will Use Airplane

The Martindale aeroplane, with which it was planned to make an aerial trip to Halifax, N.S., will be used this spring in connection with the seal hunt. The plane will act as a scout, reporting the locations of the seal patches to the steamers engaged in the hunt. The machine will also be used to communicate with, and carry provisions to ships caught in the ice blockade off St. Johns, Newfoundland.

New Milk Production Record

A new four-year-old Canadian milk production record has been set by the Arshire "Buttermilk" Guernsey, owned by Prof. J. D. Clark, superintendent of the Experimental Station at Charlottetown, Prince Edward Island, which under a 360-day test produced 16,144 pounds of milk and 683 pounds of fat. The cow is permitted to graze 400 pounds in excess of any previous record.

The Weekly Provincial News Bulletin

Fighting The Grass Hopper

E. H. Strickland, who for some years has been Dominion Government Entomologist, is now located at Alberta University, as Professor of Entomology, a chair which has been recently created in the faculty of Agriculture. Mr. Strickland has been loaned by the University to the department of agriculture of the province for the coming summer, to supervise the efforts to combat the spread of the grasshopper pest. He will have an office in the government buildings, and will be directly connected with the Department of Agriculture. Mr. Strickland for the past few years has been spending considerable time in Southern Alberta, engaged in a campaign against the grasshopper. This plague threatens his year to reach alarming proportions, and the government of the province is taking all steps possible in the matter.

A Pest Act, which requires all residents in the infested territory to take steps for the control of pests on their land has been added to the statutes of the province, and the department of agriculture has been authorized to purchase large quantities of the various materials that are necessary for poisoning grasshoppers.

These materials will be distributed throughout the infested territory and will be supplied to the councils of municipalities and to the unorganized districts at half their cost to the government.

It is hoped that every municipality council will obtain a machine for mixing these ingredients in order that a well prepared bait can be supplied to all farmers whose land is infested with this pest. The council of several municipalities installed these machines last year, and the bait prepared by them was far more effective and considerably cheaper than was hand-mixed bait.

At various points in the unorganized territory the department of agriculture is arranging to have similar machines installed. The cost and expenses in connection with operation these will be borne by the district that they serve.

Past experience has shown that grasshopper outbreaks can be successfully terminated by the effective and thorough use of poisoned bait. The history of most grasshopper outbreaks has been, however, that there is always a percentage of the population that does not appreciate their responsibilities under such circumstances, with the result that the outbreak drags on for several years. The Pest Act contains clauses compelling owners of land to control this pest on their own property, but the grasshopper outbreak will not be successfully checked unless all the residents in the infested areas are prepared to support the spirit of the act beyond a better. This applies, not only to farmers and other land owners, but to the business men of the towns and villages.

There are large areas of unoccupied land in every municipality and near every village and town in Alberta. Many of these already are known to contain grasshopper breeding ground. It is suggested that these be scouted under the auspices of local boards of trade or other organizations. If, in the spring, they are found to be heavily infested with grasshoppers, men should be detailed to poison them, or if the areas are extensive could not a date be set as a Civic holiday upon which the residents of the town are organized to poison these breeding grounds before the grasshoppers spread from them to neighboring farm lands where they will be a detriment to the whole community.

Everyone in Alberta will have to contribute to this expense of the grasshopper campaign this year, and if this campaign is not a complete success, they may even have to contribute more heavily next year, for the pest has increased, for the time being, beyond the bounds of natural control, and it can be reduced only by the efforts of the residents of the infested portion of the province.

Residents of Alberta, who are not farmers, should bear in mind and decide, whether even for the most selfish reasons, it would not pay them to take part in the campaign that will be waged by the farmers against the grasshoppers this summer.

The new corporations taxes to be imposed by the provincial government, as announced in the budget speech of Premier Greenfield, may be summarized as follows:

Express Companies—\$500 against each office in Calgary and Edmonton. \$200 in each of the smaller places of 1000 and up; \$100 for offices in towns of 1500 and over; \$50 for offices in centres of less than 1500, and \$10 for offices in any other place.

Fire and Life Insurance Companies—Two per cent, other insurance companies, one per cent.

Grain Companies—Fifty dollars for each elevator or warehouse situated on railway lines or sidings, or which receives grain for storage before inspection.

Incorporated companies with capital not exceeding \$20,000 will pay 40 cents per thousand instead of 20 cents as formerly.

The new taxes will become due on June 30th this year, and thereafter on January 1st of each year.

There will be no further tax on loan or trust companies.

About 40 miles of new railway extensions will be added to provincial railway systems this year, according to announcement by Hon. V. W. Smith, minister of railways. One extension of 15 miles will be from Grand Prairie westward towards the Lake Saskatchewan district on the E. D. & B. C. Another extension will be 12½ miles on the Canada Central Peace River line from the present terminus of Berwyn to Waterhole district. Another extension of 11 miles will be built to the Lacombe and Northwestern line. Improvements totalling \$2,000,000 will be made on the A. & G. W. this year.

Revises High School Studies

Revision of the high school course in vogue in the province is now proceeding, and an interim report has been submitted by the Hon. Perrin Baker, minister of education. The committee has been working in conjunction with the committee revising the public school course of studies.

The new public school course will come into use with the opening of the fall term in September. The new high school course, now being framed, will not come into use until next year. The high school committee has already adopted several general principles on which the new course of studies will be framed. The main principle is that the new course should be much more flexible, to meet the varying needs of pupils under different conditions, and to care for the limitations of some school boards not always able to provide certain courses.

There will be a greater opportunity for vocational study in the new course and special provision is made for students who wish to study agriculture, mining or commerce, and so forth. There are to be a large number of subjects common to all courses and made obligatory during the first year of the course, but later there will be greater freedom of choice of subjects. English and physical education are to be obligatory subjects in all years of the high school course. The minimum standard of efficiency which has been 34 per cent will likely be raised to 50 per cent. The principle of promotion by subjects, thereby making examinations in all subjects imperative, was endorsed, though not without considerable opposition by one member of the committee.

Chautauque dates this year will be June 10th to 24th, inclusive.

control, and it can be reduced only by the efforts of the residents of the infested portion of the province.

Residents of Alberta, who are not farmers, should bear in mind and decide, whether even for the most selfish reasons, it would not pay them to take part in the campaign that will be waged by the farmers against the grasshoppers this summer.

New Taxes

The new corporations taxes to be imposed by the provincial government, as announced in the budget speech of Premier Greenfield, may be summarized as follows:

Express Companies—\$500 against each office in Calgary and Edmonton. \$200 in each of the smaller places of 1000 and up; \$100 for offices in towns of 1500 and over; \$50 for offices in centres of less than 1500, and \$10 for offices in any other place.

Fire and Life Insurance Companies—Two per cent, other insurance companies, one per cent.

Grain Companies—Fifty dollars for each elevator or warehouse situated on railway lines or sidings, or which receives grain for storage before inspection.

Incorporated companies with capital not exceeding \$20,000 will pay 40 cents per thousand instead of 20 cents as formerly.

The new taxes will become due on June 30th this year, and thereafter on January 1st of each year.

There will be no further tax on loan or trust companies.

About 40 miles of new railway extensions will be added to provincial railway systems this year, according to announcement by Hon. V. W. Smith, minister of railways. One extension of 15 miles will be from Grand Prairie westward towards the Lake Saskatchewan district on the E. D. & B. C. Another extension will be 12½ miles on the Canada Central Peace River line from the present terminus of Berwyn to Waterhole district. Another extension of 11 miles will be built to the Lacombe and Northwestern line. Improvements totalling \$2,000,000 will be made on the A. & G. W. this year.

Revises High School Studies

Revision of the high school course in vogue in the province is now proceeding, and an interim report has been submitted by the Hon. Perrin Baker, minister of education. The committee has been working in conjunction with the committee revising the public school course of studies.

The new public school course will come into use with the opening of the fall term in September. The new high school course, now being framed, will not come into use until next year. The high school committee has already adopted several general principles on which the new course of studies will be framed. The main principle is that the new course should be much more flexible, to meet the varying needs of pupils under different conditions, and to care for the limitations of some school boards not always able to provide certain courses.

There will be a greater opportunity for vocational study in the new course and special provision is made for students who wish to study agriculture, mining or commerce, and so forth. There are to be a large number of subjects common to all courses and made obligatory during the first year of the course, but later there will be greater freedom of choice of subjects. English and physical education are to be obligatory subjects in all years of the high school course. The minimum standard of efficiency which has been 34 per cent will likely be raised to 50 per cent. The principle of promotion by subjects, thereby making examinations in all subjects imperative, was endorsed, though not without considerable opposition by one member of the committee.

Chautauque dates this year will be June 10th to 24th, inclusive.

Cowley Happenings

Mrs. R. Littleton is spending a few days in Lundbreck.

Winter is holding its own here, with a recent fall of snow.

The Ladies Aid will meet at the home of Mrs. Robert Littleton on Thursday next.

Mrs. Doyle is in Lethbridge, where she has been having surgical treatment.

Mrs. A. Baines, of Lethbridge, has returned home after visiting here for a few days.

After spending two years here, Miss Edie Casey has gone to her home in Chatham, Ontario.

Mr. and Mrs. James Edwards, who have resided in town for the winter, are moving to their ranch this week.

The Messee Rosemond and Hazel Blackburn spent the week end here, the guests of Mr. and Mrs. M. A. Murphy.

On Saturday, April 1st, the day "Deacon Dubb's Dilemma," will be staged by local amateurs. A good time is promised.

George Ratoon has just completed an up to date barn and house, which adds to the appearance of the town considerably.

In last week's issue we reported a conflict and ballroom dance, which was a huge success. But this week, we regret to say, there is another wave of flu, which is called "conflict flu," with a ballroom cough.

Evangelistic services are being held in the Union church here this week by the Rev. J. C. Unsworth, of Victoria, B. C., assisted by solicitor and song leader W. Lunnigan. These meetings are proving very interesting and are well attended. Lantern views and song slides add variety.

On appeal, the election for councillor in Division 5 of the Municipal District of Livingston was reviewed here on Monday, March 27th, by His Honor Judge MacDonald, and the election of John S. Hewitt nullified in the recount. K. D. Crawford was awarded the election by a majority of one.

An unusually large crowd attended the whist drive here on Wednesday evening. The first prize winners were Mrs. Pean, of Lundbreck (aluminum pot), and Mr. Lowmyer, of Calgary (pair of house slippers). Harold Cleland won the special prize, while the booby prizes were awarded to Mrs. C. Latta and Mr. H. D. MacMillan. The appetizing supper was furnished by Miss Nellie McWilliams and Miss Bernice Anderson. At this drive it was decided to have the drive continue until the end of April.

There is no one more reasonable than the florist to deal with. If you buy a 50 cent plant he'll give you the earth.

We complained the other day at luncheon that the stuff served was not fit for a pig to eat, the waitress replied: "My mistake, Mr. I thought it was, but I wouldn't have brought it to you."

Dr. MacDougall King, only brother of the premier of Canada, died in Denver, Colorado, recently, of muscular atrophy. The body will be buried in the family plot at Toronto.

Rev. Dr. W. T. Horridge, former moderator of the Presbyterian Church in Canada and an uncompromising advocate of church union, has accepted the pastorate of Grace Methodist church, Winnipeg, for an indefinite period.

Dr. D. C. MacKenzie, formerly doctor for the miners at Bellevue, but now practicing as an eye, ear, nose and throat specialist at Vancouver, has been renewing old friendships around The Falls.

Results Of Investigations Showing The Milling Value Of Western Wheat Varieties

A report which summarized the results of investigations conducted by the field husbandry department of the University of Saskatchewan during the past eight years has been prepared by Manley Champlin and Cyril H. Goulden, and submitted to Dean W. J. Rutherford. This report shows the milling value of all of the important varieties of wheat grown in Saskatchewan and many of less importance which have been tried at the field husbandry plots at Saskatoon. The samples on which these investigations were based were grown at Saskatoon, and that they are all comparable with another as far as environment is concerned.

As a result of this investigation it has been found possible to divide the several wheat varieties into groups, according to their milling value. Group No. 1, having the highest milling quality, includes Marquis, Red Fife, Kitchener and Red Bobs. Group No. 2, having fairly good milling quality, but not equal to those above mentioned, includes White Bobs, White Fife and Taylor's Wonder.

Group No. 3 consists largely of bearded wheats. These have not usually given as favorable milling results as the second group. Group 3 includes Prelude, Pioneer, Chelsea and Eratone. These varieties are the only one in this group which is commonly grown. Group 4, includes the Ruby variety only. This variety has given such contradictory results that it is placed in a special class by itself and will be investigated before definite conclusions can be arrived at as to its proper rating. Group 5 includes Club, Redstone, Alaska and Kinley. These wheats are of undoubted poor quality so far as producing flour suitable for the manufacture of bread is concerned. Club wheat is the only one in this group which is commonly grown, and so far as has been ascertained, it is grown in but one or two localities in Saskatchewan at the present time. Alaska is the name given to a frequently exploited type of wheat which has been advertised as a remarkably high-yielding variety, but it has never been widely grown because of its poor milling quality and lack of resistance to disease.

Group 6 includes the amber durum varieties, among which are Kubanka, Acme, a selection of Kubank which is unusually rust-resistant. This group, a black-headed white chaff durum, wheat, like the Acme, is decidedly rust-resistant. Of this list of varieties, Kubanka is by far the most commonly grown at the present time. Acme is not listed at the different points in the province this year, under the supervision of the field husbandry department. The other varieties are less common. Milling investigations of durum wheat are rather meagre, but such as have been conducted indicate quite clearly that there is considerable variation in the value of the different varieties of this group.

Group 7 includes Red Durum (D-5), which belongs to the durum group, but is dark red in color, resembling the Red Fife in some respects. It can be distinguished from any of the bread wheat varieties by the fact that it has no brush on the kernels. The milling quality of this wheat has been investigated in the United States and found to be very poor. For that reason it is recommended that it would be better not to introduce it into Saskatchewan for fear that it may be mixed with the high quality varieties which are now grown.

Upon the whole, this report substantiated the conclusion that farmers who are growing Marquis, Red Fife, Red Bobs or Kitchener among the bread wheats are making no mistake, and that those who are growing Kubanka of pure type among the durum wheats have selected the best available variety so far as milling quality is concerned.

The factors considered in studying the milling have been loaf volume, color and quality of bread color and texture of flour, shape of loaf, general appearance and the amount of water absorbed. The results of these factors are clearly shown in the report, and complete tabulated data are included, showing reasons upon which the conclusions are based.

The milling qualities of Saskatchewan wheat are pre-eminent. Whether or not this virtue can be capitalized and made to bring returns to the province, depends upon two factors. First, the ability of the growers to continue to grow high quality milling wheat of dependable varieties; and second, the ability of the marketing organizations, including elevator companies, the milling interests and the co-operative organiza-

tions who are concerned with the marketing of wheat in this province, to advertise and to make known the fact that Saskatchewan wheat is of excellent quality and to secure the premium which each wheat deserves for which the consumer will gladly pay if he can be convinced of its quality and be definitely assured of receiving the genuine article.

Early and Late Layers

Hens that Start Laying Early in the Winter are Most Profitable

Under the supervision of the Dominion Poultry Husbandman, experiments have been made at the Central Experimental Farm, Ottawa, to determine which hens would lay best during the summer months; also to ascertain if there is any relation between winter and summer laying, that is to find out if a hen that lays during the winter will be more likely to lay better or worse during the summer than a hen that fails to lay during the winter months. It has frequently been claimed that a hen will lay just as many eggs whether she starts in November or April. On the contrary, these experiments show that the pullet which does not start to lay until near spring never catches up with one that begins in November or December. To help solve the problem, the pullets and hens in these experiments were divided into three groups—those that started to lay in November, those that started in January, and those that started in February. The birds that started in November laid in that month and December an average of 14.5 eggs and for June, July, August and September averaged per bird 32.8 eggs. The January birds in that month and February averaged each 14.5 eggs and for the four summer months averaged 30.1. The February group averaged in February and March 21.5 eggs and for the four summer months 27.5. This appears to indicate that the earlier the bird begins to lay after November 1, the more eggs will she be responsible for during the summer months. It is also generally conceded that the bird that lays late in the fall—not molting until near winter—is the heavier layer. It is not a good plan to kill in the autumn those hens that are not fully feathered, as they are usually the best layers.

Planting Potatoes

How and when The Work Should be Done

The best time for planting potatoes varies in the different parts of Canada owing to climatic conditions. Much depends on the condition of the ground and spring frosts, but when these have past, it should be considered the earlier the potatoes are planted the larger the crop is likely to be. At this juncture advice given by the Dominion Horticulturist, Ottawa, in his bulletin on "The Potato and its Cultivation in Canada" will be well repaid. First of all the soil should be well prepared before planting. Spring ploughing is recommended. Unlike some crops that succeed best when the soil is moderately firm when ready for seeding the potato is most successful when the soil is loose. If green manure is ploughed under immediately before planting, especially on light soils, the soil should be given extra tillage so as to thoroughly incorporate the manure with the soil and keep the first few inches from drying out. Many experiments have been tried to determine the best kind of sets to plant and, on the whole, it has been found that good marketable tubers cut into pieces are planted, and that three good eyes to a piece and a liberal amount of flesh are the best. The sooner the sets are planted after the potatoes have been cut, and the quicker they are covered, the larger the yield will be. Costing the sets with land plaster or lime increases the yield. The most economical depth to plant is from four to five inches for good leamy soils.

Along in Glass

Destruction of the Roma legions both the army and navy without ships larger than the navy blimps. There is not now in the United States a ship or semi-rigid craft even faintly resembling the German Zeppelin that carried London to the ground during the war. The ZR-1 is under construction by the navy, however, and recently arrangements were made with the co-operation of the Air Department that the Zeppelin plant in Germany should build for the navy a Zeppelin of the L type, which proved successful during the war.

Armenia was the first country embracing Christianity.

Earth's Climatic Changes

New Theory is Offered by a British Scientist

A new theory has been offered by Dr. Harlow Shapley, an English astronomer, relating to the mystery concerning the climatic change on the earth over millions of years. According to this theory, the earth has been cooled off during long periods, when the sun, the earth and the other planets were passing through regions of space filled with clouds of dust or dark nebulous materials, which cut off enough of the sun's heat to freeze most of the globe. At other times, apparently, the solar system moved through a region of space almost entirely free from such material, so that the sun's rays beat with full force on the earth, probably making the polar regions pleasant and the rest of the earth livelier hot. At present the sun is apparently moving through a part of space thinly scattered with interplanetary materials.

A few million years ago, according to Dr. Shapley, the earth, the sun and the other planets were moving through a murky which is observed by astronomers in the constellation of Orion. This is one of the many vast black pockets, or "coal sacks," in the sky, some of which may be detected by the naked eye. Behind this veil in Orion are 70 faint stars which vary in intensity. They average about 700 light years (about 180,000,000,000 miles) from the earth, which is a moderate distance, astronomically, and many of them would probably be very bright, except for the curtain of dark material hung between them and the earth.

Attacks the Popular Magazines

Declaring that he "doubted much" the cry "better the movie than the bar," Dr. J. Gordon Lang, dean of the faculty of arts of McGill University, delivered an attack upon popular magazines, which he asserted were destroying a taste for good literature on this continent, in his address before a meeting of the Principals and Teachers' Association of Suburban Schools. Dr. Lang affirmed that the schools mainly follow the popular trend, the goal being pointed out by the young of financial success and "the schools have adapted their courses to the popular demand."

Alberta Farmers Erecting Silos

One hundred silos will be erected in the province of Alberta next year, according to S. G. Carlyle, livestock commissioner, who has been traveling through the province with the livestock demonstration car. Farmers have been planning an increasing realization of the better feeding quality through the use of silos and they are being erected widely.

Silk Farming

Ontario Man Starts Industry With 800 Mulberry Trees

Silk production promises to be a new industry for Ontario and Quebec farmers. Five hundred mulberry trees suited to requirements of the silk worm were planted in Middlesex County, Ontario, last autumn. By experimenting a tree has been produced which is adapted to the climate of Canada and United States. It bears no seed or berry, being grown solely for the leaf, and is the result of very careful grafting of mulberry cuttings on apple orange roots. Athol Harris, of Barry, London Township, Middlesex County, imported 500 trees from New Orleans, and planted them. He has also ordered 500 more as he has set apart five acres for their development. These trees cost \$125 each, if 1,000 are purchased, but all that have been ordered are doing splendidly. Mr. Harris states he will be satisfied if he realizes \$100 per acre this year.

Former Kaiser Stands

For National Anthem

"God Save the King" Brings Wilhelm to His Feet

The spectacle of former Kaiser Wilhelm, in full dress uniform, bristling with medals, standing at attention while an orchestra played "God Save the King" was granted a privileged visitors to Count Bentinck's private motion picture show.

At the court's invitation, the former Kaiser, his moustache now snow white and lacking somewhat its former aggressiveness, but proud and haughty of bearing as ever, went with his staff to watch an exhibition of the late Sir Ernest Shackleton's previous South Pole expedition.

When the film reached the place where the hoisting of the British flag over the southernmost possessions of Great Britain was shown, the orchestra played "God Save the King," and the audience, including the former Kaiser, stood up.

Great Demand for B.C. Land

So great is the demand for information from outside sources on the possibilities of establishing new industries and securing farm lands in British Columbia that the "Buy B.C. Products" bureau of the Board of Trade finds it necessary to add two new sections to its organization.

Captures Butter Prize

Echo Sylvia Laura Sandro, two-year-old heifer, owned by Wallace D. Wright, of Brockville, Ont., has captured the Canadian championship in a butter test. She produced 54.56 pounds of butter in seven days.

Silage Crops Can Be Safely Stored In An Economical Trench Silo

At the recent dairymen's convention at Regina, Mr. G. H. Hutton, superintendent of agriculture and animal industry of the C.P.R. department, of natural resources at Calgary, gave an interesting description of a trench silo. He said:

"During recent years it has not been a very serious problem to make money in dairying, inasmuch as the prices of butter and cream and whole milk have been ruling relatively high during that time, and the man who gave his business the serious consideration which it should receive has been able to obtain a satisfactory return on his investment."

"However, with the decline in values of all dairy products which has taken place during the last 12 months, and which, according to certain forecasts, will continue for another six months, the question of reducing costs of production becomes a very live and important problem."

"Cattle give best results when supplied with an abundance of succulent fodder. Just pasture have frequent been named as the ideal condition for economical production of milk and beef. If by a system of pickling grasses, or similar fodders we can make them available for a much longer period or during the entire season when good grass is out of season, we will have accomplished the result which will contribute toward the production of maximum quantities of milk and butter fat at minimum costs. Such a result can be achieved by the use of silos and silage crops."

"The sunflower will set aside some of the objections which might be raised to the other ensilage crops. First, it is superior to corn for dry areas, as it outyields milk crop during years of low precipitation. It is a crop which responds quickly to an increase in rainfall or to irrigation, as we have secured yields of over 34 and a half tons of sunflowers to the acre on irrigated ground this season. We secured a yield of 13 tons to the acre on dry land and during a very dry season. Second, on the other hand the sunflower crop germinates and grows at a lower temperature than corn, and resists frost in spring and fall, thus enjoying in this climate a much longer growing season than corn."

"This crop, because of its weight per cubic foot, can be safely stored in the trench silo. Such a type of silo brings this class of fodder within the reach of thousands of dairymen. It means more than this to many farmers, for many of them will now be enabled to ensilage in mixed farming, keep cattle, and thus stay on the land and get on their feet, while as prior to the advent of this crop they were facing defeat and despair."

"In recommending the trench silo, I do not for a moment disparage any of the types of silos now in use as a means of storing feed. They have one disadvantage, however, and that is that they cost money. The trench silo affords a method of storing feed which is inexpensive apart from labor and most men who are struggling to get on their feet are willing to make an expenditure of their own labor in order to achieve success."

"The quality of the feed so stored may be quite equal to that stored in the ordinary silo. It may be argued that there is a certain loss of moisture by drainage, and the point is doubtless well taken."

"I am certain that the silage stored in the trench will give excellent results, as we are now feeding some sixty-five head summer and fall calves in the open on sunflower silage from the trench silo. These calves are making excellent growth, and I have seen no thrifter lot this year than at any time. My argument is, therefore, that even though there may be some loss of food value through moisture which drains away from the trench silo, the fodder which remains is highly nutritious and superior to any fodder ordinarily available."

"The method of construction of the trench silo is simple. It consists of an excavation on a fairly well-drained site. It is not lined with cement or lumber, nor is it provided with curbing to permit the filling of the silo above the surface. It is simply an excavation. It is about eight feet deep, sixteen feet wide and can be as long as desired, depending upon the size of the herd and the material to be stored. It is fed off one end, like a loaf of bread. The daily capacity per animal is from forty to fifty pounds, depending on the quantities of straw, hay or grain, if any, which is being fed. The weight of a cubic foot of ensilage in a trench will average 35 pounds, and based on the above figures the length of the silo required to accommodate sufficient feed for the herd can be readily determined. The cutting bar was set up outside the trench, and a short length

of pipe and the hood provided the necessary piping. The silage was distributed and well tramped. This year the trench was filled only to the level of the ground, when it was covered with straw from an old stack bottom. I think it would be an improvement to round up the silage above the level of the ground a couple of feet, keeping it well tramped for two or three days. When the silage has finished settling, the trench would then be approximately full. The straw or other covering to be used could then be put on. The trench method of storing has kept the silage with practically no loss and the quality of the fodder, as I have already said, is first-class."

"Conditions demand the strictest economy in the handling of any of our fodder propositions, and if the dairymen is prepared to do some manual labor in the way of cutting the crop by hand, the only equipment that he will require in order to provide his stock with ensilage in abundance is a cutting box, the purchase of which could be handled by the community or a group of farmers, so that the cost would be a very small amount for each member of the 'Silo Association' as it might be termed."

"In conclusion I simply want to point out that this matter has been sufficiently tested to remove doubt as to its feasibility. We have at hand in Western Canada means by which the cost of production of dairy products can be reduced twenty to thirty per cent. in areas which have been formerly former methods, which includes practically all Western Canada. Figures indicate in the cost of production of dairy products in the three prairie provinces would mean a saving of nine million, six hundred and sixty-six thousand dollars."

Development of the Match

Methods of Obtaining Fire Were Crude in the Old Days

To-day's matches are an absolute necessity, and few of us could light a fire without them, yet barely one hundred years ago there was practically no way of obtaining fire other than by flint, steel and tinder. Although the principal ingredients in the modern match were known in England about 1677, it was not used in any practical way for more than a century after its discovery.

The first lucifer matches were very clumsy things, and were fired by drawing the head between folded sandpaper.

In these early matches the yellow variety of phosphorus was used. This substance is very dangerous, for it causes the terrible disease known as "phossy jaw," from which the workers suffered.

The red phosphorus now used is much safer in this respect and modern methods have practically abolished the disease. A new difficulty arose with the use of red phosphorus; it was found that the mixture used for the heads was liable to explode at the slightest shock.

After many experiments and accident, a Swedish manufacturer had the brilliant idea of keeping the ingredients apart until the match was to be struck. This was done by putting the dangerous element—the phosphorus—on the head of the match, and the harmless red phosphorus, with a little powdered glass to increase the friction, on the side of the box. In short, he invented the modern safety match.

Passing the Buck

Axel, a Swede in an outfit at Fort Jay, who up to now was known with a desire to lose. He got put on sick leave, thinking it was worth trying, anyway. At the dispensary the doc looked him over, felt his pulse, and took his temperature. Then he said:

"I can't find anything wrong with you."

No answer.

"See, here, what's wrong with you anyway?"

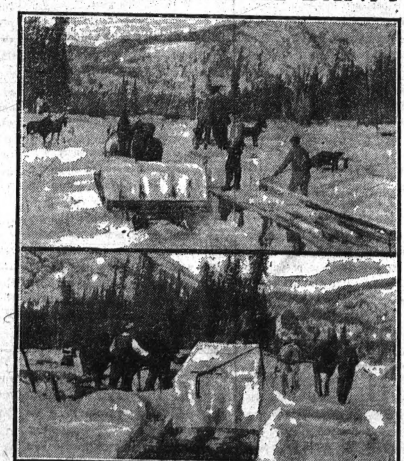

"Doc," replied Axel. "That bans your job."—American Legion Weekly.

Saskatchewan Led in Field Crops

Among the provinces Saskatchewan led last year in the value of field crops, the total for Saskatchewan being \$235,977,000, followed by Quebec with \$234,977,000, Manitoba, \$23,125,000; Alberta, \$28,885,000; New Brunswick, \$28,551,100; Nova Scotia, \$23,292,000; British Columbia, \$20,062,000; Prince Edward Island, \$16,530,500.

The most appalling accident in history was the falling of an amphitheatre in Rome in the time of Tiberius. Fifty thousand people were crushed.

ICE INDUSTRY AT BANFF

ICE OPERATIONS ON BOW RIVER AT BANFF

The winter season at Banff, Alberta, gives opportunity for the production of an extensive ice industry. It is unique as the only industry of its kind west of Belknap, Manitoba. The ice-field on the Bow River is a huge industry in the winter time. It is a tract two miles in length and is leased for ten-year periods. Operations begin as soon as the river freezes. The ice is given to keep the "space clear" of snow. The ice is marked by a line two inches deep into cakes 22 by 44 inches. An ice channel is made at one side of the river and the cakes are floated up to a bend in the river.

About 60 men are employed in the work each season and they use such implements as a splitting bar, a pike pole for directing the pieces up the channel, an ice saw for sawing the

cakes 28 inches down, following a pencil mark that is made early in the season around each place. The ice needle is used for splitting the blocks at the bench and the ice monkey grasps the cakes out of the ice channel and carries them to a pile. Ten cakes at a time are floated down the ice channel, each weighing about 500 pounds. The output is about 25 cars a day and will be about thirty thousand tons for the season. Each car holds 44 tons, and is shipped over the Canadian Pacific Railway.

British Columbia is thus supplied with ice. It is used in the Okanagan Valley, at Kamloops, and the coast for refrigeration. The ice is used in the form of the purest ice that can be obtained.—C. G.

Items of Local and General Interest

Co'd cash is often the means of expressing warm sympathy.

Canadian railway deficits for the past year totalled \$67,000,000. To see local human "chickens" moving around in flocks is a sure sign of a storm.

The local firemen will hold their annual ball tonight at the opera house, and a big time is expected.

The pig drive given by the local Rebekahs on Thursday night last was well attended. Good prizes were awarded.

W. Shaw, of Lethbridge, made his regular visit of inspection of district branches of the B. M. & Co. this week.

Martial law in the central area of South Africa is being relaxed. The amalgamated engineers is the only union which has not yet called off the strike.

The Exultant palace in Spain contains a cathedral, a monastery with two hundred cells, two colleges, three chapter houses, three libraries and nearly three thousand other rooms.

J. S. McEachern, of the Crystal Dairy, Lethbridge, spent the week end with his daughter, Miss Charlotte, at Coleman, and on Sunday visited friends in Blairmore.

The camel walk is forbidden in public dance halls in Winnipeg, and the fever for dancing is spreading westward. This should be enough to give the devotees of this particular dance the hump.

For every inch of stature a man should weigh three pounds five ounces.

Very few real chickens attended W. T. Eddy's chicken sale here on Saturday.

B. O. Morrow, of the Union Bank, Cowley, was in town on Saturday.

Heavy snow over most of southern Alberta last week left considerable moisture.

Mrs. McBratney, of Three Hills, spent a week here with her parents, Mr. and Mrs. A. W. Robbins.

Percy Waddy, of Nightingale met death through the accidental discharge of a 22 rifle while he was climbing through a wire fence.

A vote taken at Bellevue last week decided in the almost unanimous choice of Dr. Key, of Rowley, to succeed Dr. Beaman, who may resign the position of medical doctor for the miners of that town.

It is tragically true that while serious minded people are weighing what they will do the calendar is rushing forward to snatch from them the opportunity of doing the good they plan.

The most recent Belfast reprisal was the lining up against the wall of a saloonkeeper and his five sons and riddling them with bullets, said to be in retaliation for the shooting down of several policemen the day previous.

Our observation is that when a slip young girl gets slipper, she becomes a flapper.

Commencing April 1st, the wages for common labor in the city of Trail, B. C., will be \$3.00 per day of eight hours.

Rev. B. Dillingham, of the Industrial Province, was in town visiting old friends during the week.

The marriage of Romeo Rinaldi to Miss Annie Duboc was solemnized at Hillcrest recently. The young couple have taken up residence at Bellevue.

Residences on the outskirts of Toronto are being moved closer in to make the town more compact. The same thing is happening at Blairmore.

Mr. O. Payne, former editor of the Hanna Herald, has accepted a position with The Coleman Journal. Mr. Payne has had considerable experience in the journalistic line.

The only really interesting stories are the advertising stories. While advertising they are alive, but if they ever quit they are simply in the hands of someone else to be advertised—and that's the end.

According to astronomers, more real moonshine can be seen from Mars than from this planet. But they do not tell us if the people are gazing at this earth of ours or at the moon. Anyway it is not reasonable to suppose that they have prohibition laws on Mars.

A new device developed by the navy, which makes it possible to measure ocean depths hitherto unknown and for navigators to take soundings easily and as frequently as they wish, has proved effective in recent tests on the radio and sound experimental ship Ohio.

Mistakes will be made, and sometimes by the best of men, but a man does not stand or fall by a single mistake in life, unless that mistake is a crime. People forget mistakes and they are gone in a day. A man stands or falls on his general average in life, not on any one good thing he has done or any one mistake he has made.

On and after April 1st, the rate of postage on money packets addressed to places in Canada, the Empire, the United States and Mexico will be five cents an ounce or fraction of an ounce, and each packet must carry a one-cent tax. All jewelry is now prohibited from the insured mail, but can be sent by parcel post or letter post registered.

Tuesday, March 21st, was the anniversary of the opening of the great German offensive of 1918. Those were the fateful days when Canadians participated in ceaseless fighting. Haig's extraordinary order makes some Canadians, blood still tingle when his famous exhortation "backs to the wall" was read on parade.

Forty men appeared before the court at Coleman on Monday to answer the charge of being frequenters of a gaming house. The proprietor was fined \$50 and costs while a fee of \$11.50 and costs was exacted from each of the forty-nine. The raid on the premises was made jointly by Constable Lawson, of the A. P. P., and Constable Houghton, of the town police, while the prosecution was in charge of Chief Detective Schoeppe, of Calgary. Naturally the Town of Coleman will net a neat sum from the revenue derived. We understand that the operator or proprietor of the gaming room has also been given a few days in which to get out of town.

Premier Poincaré, of France, and Lloyd George will attend the Genoa conference.

Koeneke Large, of the Fernie Motors Garage, passed through from Calgary to Fernie on Monday with two Chevrolet. Owing to the snowstorms he was obliged to load the cars here for shipment to Fernie.

A form of propaganda, which has caught the Indian imagination and is being widely carried out in British East Africa, consists of daily public prayers asking that sanity be granted the British ministers.

George Richardson, who blew the charge when the "Light Brigade" rode up to the guns at Balaklava, died at Liverpool recently. It is believed that he is the last of the "gallant six hundred." He possessed sixteen medals given for valor.

Mrs. James Warner entertained at an enjoyable whist drive on Saturday afternoon, in honor of her daughter, Flora's sixteenth birthday. The first prize was won by Miss M. Pasmore, and the consolation by Miss Elizabeth McLeod. All report having had an enjoyable time.

Mrs. Charlie Nicholas, who has been undergoing treatment at Mayo Brothers' hospital in Rochester, Minnesota, returned home to Coleman last week end, accompanied by her father, Joseph Joseph, senior, of Hillcrest. Mrs. Nicholas has greatly improved in health as a result of special treatment at Rochester.

Tonight, it might be remembered, a local organization entitled to local support, is staging a dance at the opera house, which they hope will be patronized by a local public. The organizers are at error, though, in not at the same time encouraging the local orchestra, instead of sending a large portion of the proceeds to points between Macleod and Calgary by parties who no doubt have to pay their taxes there. This town does not depend one iota upon the citizens of far-away towns for its upkeep, but looks to the citizen who has domiciled here, and manifested the true spirit of a citizen by investing money here in taxable property, to keep it a-going.

Speaking of the visit of the Okotoks Intermediate Hockey Team to Blairmore, the Okotoks Review has the following comment: "Secretary LeMotte went up to Blairmore in charge of the team but unfortunately got lost in that large city and never got back till Thursday, greatly to the alarm of his friends here who had all the police in the Pass looking for him. J. C. says he never took a drink of anything stronger than tea or coffee. He admits this wasn't from conscientious scruples, but because he didn't like the smell of the stuff they offered him up there. He said he didn't see why anybody should kick up a fuss about his staying away as he was only seeing an old friend? (not in years) at Blairmore, where he had formerly been stationed; and he did not notice the time slipping by so quickly.

The April issue of Rod and Gun in Canada is a particularly attractive one, and from cover to cover it abounds in bright, interesting features. The stories include a splendid contribution from the pen of Frank Houghton, entitled "The Trail of a Golden Hope," while "Birds," by Phil H. Moore, is also worthy of special mention. Bonnycastle Dale is the author of "Our Wild Decays." The various departments contain a wealth of valuable information, as usual. A complete report of the annual meeting of the Northern Ontario Outfitters and Guides, is given. A handsome art cover by F. V. Williams, who also contributes a short story, will likewise attract attention to this month's issue. Rod and Gun in Canada is published monthly at Woodstock, Ontario, by W. J. Taylor, Limited.

FOR SALE

Anyone wishing to buy a Horse, Buggy and Harness complete, see S. Rowe, Bellevue, Alberta.

His Misfortune

Disappointed Wife—You won't give me the money for that beautiful fur coat. I took and took for you, and what do I get? Nothing! Her Husband—Your lucky. I get indignation.

DO YOUR EARS BUZZ? HAVE YOU HEADACHES?

When your ears ring, your head aches, and you seem slightly hard of hearing, beware of Catarrh. Mr. J. A. Hazen, writing from Greenmouth, P.E.I., was similarly troubled, and writes: "No one could have been Catarrh than I had for years. It caused partial deafness, bad taste, upset my stomach, made me sick all over. Catarrh cleared my nostrils, stopped the cough and gave me a clear feeling in my breathing organs. I am now absolutely well, thanks to Catarrh." Nothing so certain as a Catarrh. Inhaler to strength then a weak throat, to rid you of Bronchitis, to drive out Catarrh, coughs and colds. Sold everywhere, 25c, 50c and one dollar for complete two months treatment. Dealers, The Catarrhose Co., Montreal.

Oh, Money! Money!

BY
ELEANOR H. PORTER

Printed by Special Arrangements with Thea Allen, Toronto, Ont.

(Continued)

"There! And I never thought to bring it," ejaculated Miss Flora vexedly. "But never mind—I can tell you all she said. She didn't write much. She said it would be in all the Eastern papers right away, of course, but she wanted to tell us first, so we wouldn't be so surprised. He's just come. Walked into his lawyer's office without a telegram, or anything. Said he didn't want any more money. Mr. Tyndal brought home the news that night in an 'Extra', but that's all it told—just that Mr. Stanley G. Fulton, the multi-millionaire who disappeared nearly two years ago on an exploring trip to South America, had come back alive and well. Then it told all about the two letters he left, and the money he left to us, and all that, Maggie said; and it talked a lot about how lucky it was that he got back just before the other letter had to be opened next November. But it didn't say any more about his trip, or anything. The morning papers will have more, Maggie said, probably."

"Yes, of course, of course," nodded Jane, rolling the corner of her napkin nervously. (Since the forty-thousand-dollar loss Jane had gone back to her old habit of wearing two aprons.) "Where do you suppose he's been all this time? He was lost or just exploring?"

"Maggie said it wasn't known—that the paper didn't say. It was an 'Extra' anyway, and it just got in the bare news of his return. But we'll know, of course. The papers here will tell us. Besides, Maggie'll write again about it, I'm sure. Mr. Maggie! I'm so glad she's having such a good time!"

"Yes, of course, of course," nodded Jane again nervously. "Say, Flora, I wonder—do you suppose we'll ever hear from him? I don't know all that money—he knows that of course. He can't ask for it back—the lawyer said he couldn't do that. Don't you remember? But I wonder—do you suppose we ought to write him and—

and thank him? At last my nerves are all right. Oh, mercy!" exclaimed Miss Flora, aghast. "Mercy me, Jane! I'd be scared to death to write him, just now. That, Oh, you don't think we've got to do that?" Miss Flora had grown actually pale.

Got No Sleep

But now the neuritis has gone, the pains have ceased, the nervous system is restored and the writer of this letter pays a grateful tribute to the medicine which made him well.

Mr. John Woodward, P.T.O., Lucan, Ont., writes:

"It gives me much pleasure to recommend Dr. Chase's medicine, especially the Nerve Food. I was suffering from neuritis for several years, and tried all kinds of remedies, yet never seemed to get any better. At last my nerves and whole system seemed to give way through not being able to get any rest or sleep at night for pain, which finally made me take me all parts of the limbs and feet. My nerves would twitch just as I lay in bed. At last my nerves and point of despair, I decided I would get Dr. Chase's Nerve Food, which I did, and after taking two bottles I believe myself almost cured. I also keep a box of Dr. Chase's Kidney-Liver Pills on hand, and for the past year I seem to enjoy my usual health."

Dr. Chase's Nerve Food, 50c a bottle, and Dr. Chase's Kidney-Liver Pills, 25c a bottle, are sold by B. & C. Co. Limited, Toronto.

W. N. U. 1418

WEAK HEART NERVES BADLY SHATTERED

Many a woman who should be strong and healthy, full of life and energy is bound by the shackles of ill-health.

Some disease or constitutional disturbance has left its mark on the body of a weak heart, shattered nerves, impoverished blood and an exhausted condition of the whole system.

**MILBURN'S
HEART AND NERVE PILLS**

They will find a remedy that will supply food for the exhausted nerves, one that will strengthen and regulate the weak heart and invigorate the whole system.

Price, 50c a box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

are, sighed Miss Flora. "Poor Maggie! I only wish he'd marry her and give her a good time all her life!"

"Well, why not? She's good enough for him," blurted out Miss Flora. "Maggie's a saint—if ever there was one."

"Yes, but I shouldn't call her a marrying saint," smiled Jane. "Well, I don't know about that," (To be continued)

How To Roast Meats

BY LORETOE K. LYNCH
An Acknowledged Expert in All Matters Pertaining to Household Management.

The little bride surveyed the large piece of roasting beef her enthusiastic husband had just brought home for the first company dinner. It was a toothsome looking piece of beef, well moistened with fat. But, whether she should cook it one hour or five she was at a loss to know.

Of course, one should never attempt to have for a company dinner something she has never tried to cook before, but the meat had come—there was no use sighing now. And be- fore this had happened to many housekeepers, I want to give some general directions which may help all.

When meat comes into the house it should be unwrapped at once, any discoloration made by the meat hook out and the meat carefully wiped off with a cloth (kept especially for this purpose) wrung out of cold water. It should be placed in a cold place, but not in direct contact with the ice.

When it is time to cook the meat, first light the oven, if it is of the gas type, so that the oven meat is to go into is really hot when the meat enters.

The meat should be dusted over with flour on all sides and placed on the great rack of the roasting pan. If the pan has a rack, or on the grates if it has. A little flour may be dredged into the bottom of the pan. Also, a level teaspoon of salt should be put into the bottom of the pan and the meat placed on it.

When the flour has browned to a light brown, or a golden brown, add a cup or more of boiling water, depending upon the size of the pan. This, together with the meat juices, the fat and the browned flour, will later be the main ingredients of the gravy. This should be dipped over the meat about every fifteen minutes until the roast is done, unless one has a self-basting roaster. In this case, after the flour has browned, the water is added and the cover placed on. The basting then goes on automatically.

Some folks like a half clove or garlic placed in the pan with roast beef, while others like a cut onion. A few grains of nutmeg is delicious over lamb or mutton.

In figuring the time to roast beef one should know the weight at least approximately. If one wants the beef rare allow about fifteen minutes to the pound. For roast beef medium about twenty minutes to the pound, and for well done beef allow twenty-five minutes to the pound.

After the first fifteen or twenty minutes the heat of the oven may be reduced. Frequent basting is necessary to prevent charring. Of course, one should season only the tender cuts from little used muscles for this method of cooking. It is very wasteful indeed to attempt to cook tough meat in this manner.

Lamb and mutton, as well as pork, when roasted, should be cooked so as to be well done. Therefore, for these allow the maximum length of time to the pound.

**Instrument Measures
Speed of Locomotive**

Possible to Keep Efficient Check on Engine Driver

Much of the improvement of the locomotive which has been achieved recently is due to the use of accurate measurement of performance. Some years ago a British firm brought out an indicator which shows and records the speed of a locomotive by drawing curves on a time basis. A demand arose for an instrument giving records on a distance basis; and the same company has now produced an instrument for that purpose. One great advantage of records on a distance basis is that the exact speed of every gradient and curve or bridge can be at once ascertained. Thus an efficient check is kept on the driver, who is under obligation to reduce speed on certain parts of the line. Although the instrument is much too complicated for a short description it is so robust and so well designed that only three parts require lubricating more frequently than is needed for ordinary enclosed clock mechanism.

Limit Immigration

A proposal has been submitted to the Legislative Council of Canada, which would prohibit Chinese and any aliens who might be considered undesirable from landing, except they pass a test proving they are not illiterate and pay \$1,000. Feeling is high there against Chinese immigration.

ROYAL YEAST CAKES

Product of Canada
It was known many years ago that yeast is an excellent thing for the many ills that result from disordered stomachs or run-down blood condition. Lately eminent scientists have been investigating the matter thoroughly and their conclusions point to the fact that the beneficial effect of yeast has not been overrated. The yeast treatment is very simple and economical and altogether harmless.

Before each meal eat a Royal Yeast Cake, or take a cake dissolved in water or fruit juices. The scientific investigators say that the curative elements in Royal Yeast are the vitamins and nuclein which it contains. It is certainly well worth a fair trial by those who suffer from any of the ailments mentioned above.

Send name and address for free booklet "Royal Yeast Cakes for Better Health."

CATARRH
Catarrh is a local disease greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE is a tonic when internally used, and acts through the blood upon the mucous surfaces of the system. CATARRH MEDICINE assists Nature in restoring normal conditions.

Increase in Autos in Manitoba
There are 32,340 automobiles in Manitoba, according to a report issued by the municipal commissioner, with 12,133 cars in Winnipeg alone. In 1908 there were only 418 cars in the province; by 1914, 6,974; by 1918, 23,627; and 1920, 36,465. In 1908 there were only 52 makes of automobiles registered in the province, and now there are 162 makes. In 1920 there were 448 registered auto sellers in the province.

L. H. Putnam was a Lethbridge
visitor last week end.

N. E. McFarland, of the local
F. Thasell Bros., was a business
visitor to Lethbridge over Sunday.

Dick Slagg was renewing old
acquaintances around Blaimore
on Tuesday of this week.

Messrs. Kubic and Kubasek
have purchased the flour and feed
business of C. Sartoris.

A prohibition poster says:
"Many on the prohibition wagon
should feel better off."

Mrs. W. A. Henderson returned
Sunday morning last from an ex-
tended visit to Eastern Canada
points.

Mrs. Metzler has opened her
millinery parlor over the drug
store, where she has been doing a
whale of a business.

Call and see The Enterprise
selection of Easter Cards and
Folders. The finest ever shown
here at the lowest price.

Because the best looking
chickens fetched no more than
\$1.65 each at the sale on Satur-
day, the majority stayed at home
to help their mothers.

Mails are being carried suc-
cessfully between Newfoundland and
Labrador points by airplane, un-
der the pilotship of Pilots Bennett
and Cotton.

W. Nicoll, who was burnt out a
few weeks ago, has secured the
Sargent building, at the rear of
the old Cash Grocery, where he
will be open on Saturday with a
stock of boots and shoes and pre-
pared to do shoe repairing.

The clubhouse promised the
Golf Club by Mr. Charbonnier,
will take the place of Conway's
tent. There will be no necessity
of the police making regular in-
spection of the larders.

A Polish priest spent several
days in town during the week,
administering the sacred rites of
the Roman Catholic church to the
Polish portion of St. Anne's con-
gregation.

Lagrippe is very prevalent
around town just now, and while
quite a number have recovered
during the week, just as many
more have had to give in to the
malady.

A story comes from Switzerland
that an American woman who ad-
vertised for a secretary and offered
a moderate salary and a comfort-
able home, received applications
from three princesses, nine bar-
onesses, thirty countesses and an
almost endless number of the
wives and daughters of former
high officials.

Insurance companies seem to
have become very interested, all
of a sudden, in the lives of Pass
citizens. Looks as though they
anticipate some great calamity
that would result in an efflux of
our citizens to some other land
where policies terminate.

Those who had the opportunity
of attending the Union church on
Monday night last enjoyed a rare
treat in the lecture delivered by
Professor E. A. Corbett, of Alberta
University, on "The Habitant," or
"Scenes from French-Canadian
Life." All through the lecture
was brimful of interesting humor
and French-Canadian lore. It
would be impossible to find one
more capable of interpreting the
broken English and perfect
French-Canadian tongue. Part
of the lecture was illustrated by
lantern slides depicting life
among the French in Eastern
Canada. The attendance was
fairly large. At the close a hearty
vote of thanks was tendered the
lecturer and a collection was
taken to help defray expenses.

adian Collieries Ltd., Blaimore.
—L. I.

A meeting of the Golf Club will
be held tomorrow night.

Mrs. Charlie Slopek was admit-
ted to hospital yesterday, rather
critically ill.

P. M. Christophers, M. P. P.,
returned home from Edmonton
yesterday.

The Hudson Bay Company has
purchased the large departmental
store of J. F. Cairne at Saskatoon.

Civic salaries at New Glasgow,
Nova Scotia, have been cut from
10 to 25 per cent.

Undertaker Ferguson is erect-
ing a building at the rear of his
residence, to be used as undertak-
ing parlors.

Some people who are schooled
only in the English language
manage to make fluent use of an-
other language on the golf course.

Several more Studebaker and
Chevrolet cars were unloaded here
this week by the Crows' Nest Pass
Motor.

Saturday last was "One Cent
Day" at the Blaimore and Belle-
vue drug stores and a roaring
business kept the clerks moving
all day.

A special meeting of the I. O.
D. E. will be held in the Mission
hall on Saturday at 3 p. m., for
the purpose of election of officers
for the ensuing year.

C. F. Sedgwick was up from
Lundbreck for a few days this
week. Mr Sedgwick has leased
his South Fork farm to the Don-
kubors.

We understand that high school
teachers are instructing the girl
pupils to increase the size of their
smiles, so that so much of the
nude will not be visible.

We are pleased to see Mr. J. B.
Risk around again, after some
three months confinement to
hospital and home. He went
down to Lethbridge Tuesday
night to spend a few days.

A New York damsel expresses
a desire to meet any woman of
130 pounds in the boxing ring,
and a friend of ours suggests that
the other one be rounded up, that
the pair may be tied together and
thrown across the fence rail to
decide matters.

The twenty-second annual show
and auction sale of cattle, horses,
etc., will be held at the exhibition
grounds, Calgary, commencing
Tuesday next, and at Edmonton
three days later. The railways
are offering special reduced fares
of fare and one-third to both Cal-
gary and Edmonton.

Twenty stars of the American
film world arrived in Jerusalem
recently to prepare for the filming
of the Old Testament story of
King David. The big scene in
the play is to be the fight between
David and Goliath. Biblical ac-
curacy is not to be strictly follow-
ed, since the plot provides a love
scene after the battle. About five
thousand persons are to be em-
ployed in the picture, as well as
five thousand sheep, one thousand
camels and two thousand goats.

A curious incident occurred re-
cently at the Wallace Yards,
Vancouver. The Admiral liner
"Admiral Farragut" broke from
the ways and slipped down to the
water, then floated down into
Burrard Inlet. As no tug was
at hand, the vessel gradually
beached again with the help of
jacks. Later an inspection
showed that the ship had sustain-
ed no damage, and it was ascer-
tained that a defective link in a
mooring chain had been the cause
of the unpremeditated launching.

Retailing---

—Is not buying low and selling high—

It is the process of buying products fairly and with the
smallest possible addition of cost transferring such pro-
ducts into consumable material.

Our every effort is endeavoring such a movement, and will
be borne out by the Quality—Service and Prices that may
be obtained at any of our stores.
